Single Platform – We have focused on one platform, Microsoft Windows NT /Windows 2000 servers, with a limit to the number of 'boutique', third party, development platforms.

Relationships – We have maintained a strong relationship with our suppliers and backbone providers and have not moved in 3 years, we have simply increased our usage and strengthened our ties.

Budgeting – We project and budget all expansions week-to-week up to 2 years at a time. Every new server, every extra bandwidth, is budgeted, we are never surprised by spikes in server or network usage.

Honesty – We provide clear and simple account plans that detail as much as possible what you get for each account plan.

Training – We are constantly training and re-training our staff in the latest techniques and programs. With regularly updated network, server and support procedures, we can ensure M6.net is running as efficiently as a network, server and support administration team can.
