Macgyver (Season 2) DVD Review

By Britt Gillette

Far different from the usual television action series, MacGyver premiered in Fall of 1985 to

widespread audience acclaim. Fans fell in loves with an action hero who used his brain instead of his brawn to get himself out of jams, and the interesting and elaborate methods deployed by the title character made for interesting water cooler talk. These unorthodox escape plans were very similar to The A-Team, another popular 80s action series. Overall, the first several seasons of MacGyver are the best...

The MacGyver (Season 2) DVD features a number of action-packed episodes including the season premiere "The Human Factor" in which MacGyver and the Phoenix Foundation are called upon to test the security of a top-secret military installation. When MacGyver makes a bet with the security designer, Dr. Jill Ludlum, he successfully gains entry, but the automated system traps them both inside (with a dwindling supply of oxygen) where they're forced to race for their lives against a ticking clock... Other notable episodes from Season 2 include "The Road Not Taken" in which MacGyver encounters his former fiancée while helping a nun, and "Birth Day" in which MacGyver must guard a pregnant woman from her husband, who's out to kill her...

Macgyver (Season 3) DVD Review

By Britt Gillette

One of the best shows of the 1980s, MacGyver has a dedicated fan base even to this day. Richard Dean Anderson plays the role of MacGyver, a cerebral and charismatic agent of the Phoenix Foundation for Research. A different hero even by the standards of today's TV series, MacGyver had an exaggerated fear of heights. He was also a pacifist who never relied on weapons, but instead on the ability to deploy his brain and think his way out of dangerous situations. MacGyver's boss and best buddy was Pete Thornton (Dana Elcar). Pete regularly sends MacGyver on missions and oftentimes comes to his rescue (mostly in the moments after MacGyver has saved himself and someone else). MacGyver is also often accompanied by his airplane pilot friend Jack Dalton (Bruce McGill) who constantly gets himself and MacGyver into compromised predicaments with his illegal activities and hair-brained schemes. Along with the usual bad guys, archenemy Murdoc (Michael Des Barres) is MacGyver's constant nightmare. With something interesting always in the works, there isn't a boring episode of this fascinating series...

The MacGyver (Season 3) DVD features a number of action-packed episodes including the season premiere "Lost Love" in which a woman from MacGyver's past (a woman he once loved) returns to his life. She also happens to be a known Soviet dissident who begs for his help in aiding her escape from the evil regime. But before MacGyver can help, the KGB kidnaps her and demands a priceless artifact as her ransom, leaving MacGyver as the only man who can save her... Other notable episodes from Season 3 include "The Widowmaker" in which MacGyver mourns the death of his friend at the hands of a former enemy, and "Mask of the Wolf" in which Jack and MacGyver aid in the search for an ancient Indian wolf mask while two mercenaries follow their trail...
