**Making Money Online Real Fast by Willie Crawford**

One of the questions I get asked most often in emails lately is "How do I generate an online income really fast?" This question is usually from someone in a bit of a bind... which seems very prevalent these days. I generally try to help these individuals do some brainstorming. So I've thought a lot about that questions lately. The real answer that I finally arrived at.....

The single best way to earn a lot of money real fast online is through joint ventures. That's where you and another individual (or group of individuals) take your combined resources and offer then to the marketplace by harnessing unique resources you both have. Often one person has a special product he can offer and the other person has a large list of contacts he can present this offer to. Making a special mailing or offering the product at discount to this list can sometimes generate an amazing amount in only 24 – 48 hours.

The problem is that many of the people asking me this question haven't developed any special resources yet. They don't have a product of their own or a large list. They have to overcome this dilemma before they can capitalize on the magic of joint ventures. They need to come up with a product or get the rights to a product that potential joint venture partners would become excited about.

I do a lot of joint ventures. I am even a member of a site set up solely for joint ventures. Early membership

in this by–invitation–only group includes many individuals with mailing list of over 100,000, many software developers, and many product creation and marketing experts. Joint ventures or even ezine ad swaps among members of this group produces truly amazing results.

Why do I tell you about this joint venture member–only site if it's by invitation only? We plan on opening up membership to the general online population next month. If you are looking for that big break, this may very well be what you've been looking for. I only have permission to tell you about the site at this time but

we anticipate opening it up around the second week of September. If you'd like to be notified when membership is opened up, you can get on my notification list by emailing: [willie3-46286@autocontactor.com](mailto:willie3-46286@autocontactor.com) This is an autoresponder set up just for that purpose.

Joint ventures are nothing new although the online community often talks about them as if they were. Years ago I knew of people who convinced large catalog companies to feature one of their products. They offered the catalog company the lion's share of the profit. Just this one type of joint venture has produced many mega–successes.

There are even seminars set up to teach you about joint ventures. The next one I know of is September 5th – 7th, 2003, in Kansas City, Missouri. At this seminar, 15 of the world's foremost joint ventures experts reveal exactly how they set up huge deals and they even look for joint venture partners themselves. You can get more details on this event at my seminar and workshop tracking site: <http://internetmarketingseminarschedule.com/> I created this site as a way to keep track of what was going on in the seminar industry.

So joint ventures are the key and your challenge is to find, develop, somehow locate something of great value that potential joint venture partners would be interested in. That's not that easy because many joint venture prospects get numerous offers every week. A typical week for me will have 8–10 people emailing me a sample of their software product to look at, perhaps 20 people asking

me to consider promoting their ebook and another 10 asking for some type of endorsement. If I get this many JV offers, I know that there are others who must get several times this many offers. As you can imagine, it's impossible to even consider all of these deals, so only something truly exceptional will make the cut.

Joint ventures don't have to be with just "major players" though. You can more easily joint venture with fellow business people who are perhaps just starting out. The potential return is usually not as great, but if you can set up JVs with 10 or 20 smaller businesses, your aggregate results may be. So, don't just look for joint ventures with publishers with huge lists, look for joint ventures with almost anyone you come in contact with on a daily basis. You'll soon discover that you have a lot of joint ventures going and in the process

your business is growing at a much accelerated rate.

Don't wait, start harnessing the power of the joint venture today.
