**Mesothelioma Research: Search For Hope**

**By Kirsten Hawkins**

Mesothelioma research refers to the studies for discovering new facts or information about

mesothelioma cancers. Mesothelioma is a life threatening cancerous disease. It affects the lining of abdominal organs and lungs. Only known reason of this disease is exposure to asbestos particles. Diagnosis of mesothelioma is a difficult process. This is mainly because asbestos particles may lie dormant in the body for up to 50 years before appearance of symptoms. Average survival time of mesothelioma patients is 1–2 years. Mesothelioma research is important considering the increasing number of mesothelioma patients every year.

**Key Points of Mesothelioma Research**

Most of the mesothelioma research going on today is focused towards the effects of asbestos particles on human cells. Scientists undertaking mesothelioma research are studying the process through which asbestos corrupts the healthy cells of the body. Ongoing research about mesothelioma provides a ray of hope that sometime in the future it may become possible to prevent the damaging effects of asbestos particles on human cells.

During the course of mesothelioma research, experts are also performing clinical trials on the mesothelioma patients. They are conducting clinical trials on the patients who are diagnosed for mesothelioma cancers on early stages as well as later stages. Doctors emphasize on trials on both types of patients because both of them equally require relief from mesothelioma cancers. Ongoing mesothelioma research and newer information every day provides hope to mesothelioma victims that any trial can result into the discovery of an effective treatment for mesothelioma cancers.

**Sponsors of Mesothelioma Research**

Many organizations including the companies responsible for the exposure to asbestos particles are sponsoring mesothelioma research. It is the moral duty of those companies because many people are on brink of death because of their negligence. Law firms are also keeping a close watch on mesothelioma research because many patients are adopting legal course for seeking mesothelioma compensation. A mesothelioma law firm has better chances for getting compensation for its client if

they better information about this dangerous disease.

## **Some Facts About Mesothelioma Case**

### **By Kirsten Hawkins**

#### Understanding Mesothelioma Case:

Mesothelioma case is a legal procedure wherein a person suffering from mesothelioma cancers files a lawsuit to recover compensation. The mesothelioma victim can file mesothelioma case to recover damages for medical expenses, loss of wages, lost earning capacity, pain and sufferings. Even the family members of the patient can also file mesothelioma case to seek compensation for their loss of consortium care. Defendants in mesothelioma cases are the individuals or companies whose negligence or ignorance caused the asbestos exposure resulting in mesothelioma cancers.

#### What is mesothelioma?

Before we understand about mesothelioma case, it is pertinent to know what is mesothelioma. Mesothelioma is a serious type of cancer affecting the lining of abdominal organs and lungs. There are two types of mesothelioma, pleural mesothelioma and peritoneal mesothelioma. Patient suffering from any of these types of mesothelioma cancers can file a mesothelioma case. Loss of weight, loss of appetite, bowel problems, nausea, anemia, swelling and pain in abdomen and swelling of the feet are some symptoms of peritoneal mesothelioma. The symptoms of pleural mesothelioma are difficulty in breathing, persistent cough and chest pains.

#### Reasons for Mesothelioma Cancers

The outcome of mesothelioma case can be determined by the reason for contacting mesothelioma disease. Exposure to asbestos particles is the only known reason of mesothelioma. Asbestos is a naturally occurring fibrous mineral that was widely used in building material, construction, and many other manufacturing processes. Asbestos was widely used before 1970s. Any person who had worked in these industries even 50 years back is at risk of developing mesothelioma.

The persons who have contacted mesothelioma cancers or can contact mesothelioma or any other asbestos related diseases in near future could file a mesothelioma case to seek compensation. This is very important because prognosis of mesothelioma patients is very bleak and the average survival time for mesothelioma patient is not more than 1–2 years. Mesothelioma case can provide some relief to the

asbestos victims because the treatment of mesothelioma cancers and asbestos disease are very expensive.

Mesothelioma victims or their family members should consult an expert mesothelioma attorney before filing a mesothelioma case. Attorneys or law firms specializing in mesothelioma and asbestos cases are the best persons to offer advice on legal rights and options of asbestos victims. They are the right person who can help to recover maximum possible compensation for the victims or their family members.
