Motorcycle Cleaning

By Thomas GFORCE

Motorcycle Cleaning by Thomas GFORCE

Motorcycle
Cleaning

To some a dreaded never ending task. Why? Because you have not found the products that will save time, money and work well together to actually keep your bike cleaner, longer. These are professional products. Like the ones the Detailer's use. Did you ever stop to wonder how they do it? The only thing they know that you don't know, is what products to use.

Of course most of them charge \$40.00 an hour and up. For about the same hourly amount you can purchase the same products and do it yourself. You can obtain the same Professional, incomparable, lasting results. The Detailers HATE me, BUT the BIKERS LOVE ME. I am G-4rce.

I sell the finest MOTORCYCLE DETAIL PRODUCTS on the PLANET. (and for other fine toys too) You will be AMAZED as you make your bike look showroom new. With minimal effort and maximum results. You will reduce future clean-ups from hours to only minutes.

Believe me I have spent years trying and testing products and now you too can obtain the same lasting results. The difference between a cleaning and detailing are the products. General Motorcycle Cleanup requires only 3 products.

#1 Ouator metal polish, HexaSpray, and Hexawax. You will than need a couple of terry cloth towels. Some good tunes and a beverage is optional, and so is a bike lift.

Start by using Ouator to polish your chrome and aluminum. This product makes aluminum look far better than chrome. It is unique as you can shine anywhere you can get a finger in and a piece of towel. The more you rub>>>The shinier it gets. In shining the more black you see -the better the product.

Motorcycle Cleaning

#2 Once your desired shine is obtained lightly spray with HexaSpray. This will remove any remaining residue (black). This is a Metal Sealer. By applying this you will lock and hold the shine 3 to 5 times longer than if not applied.

#3 Then Hexawax all painted surfaces and windshield or wherever you normally apply wax. You will be amazed at the ease of application, its removal, and finish result. Your bike will stay cleaner just by Hexa waxing. The unique thing is once cleaned future clean-ups are made as easy as dusting a tabletop. As you will no longer use soap and water but instead use the HexaSpray (metal sealer) which doubles as a Superior Water-less Wash. It will restore to the original wax look without scratching. Picture this scenario. You got caught in a driving rain storm.

You used to think you had hours of cleanup. But now you park your bike. Let it drip-dry, and HexaSpray it and gently wipe with the towel, like dusting a tabletop, and in less than 20 minutes you are restored to your original shine. So easy even mama can do it. In 8 years of business the only thing brought back to me was the original buyers friend's and relatives to get them to stop using his purchase.

Do you have knee rub marks, embedded bugs, scratches or gas stains?? Try Oxy-off. Do you want to restore and protect your rubber and vinyl without that fake shinny look?? Try Clear Kote. AND NOW THE REAL SECRET to maintaining your shine is to NOT use soap and water. They strip your Hexa Spray Protection and speed up the Oxidation Process. Causing you to start the polishing process all over again.

One of the people of the World that make this Word "Shine"

How To Buy A Motorcycle On Ebay

By David Riewe

If you want to buy a motorcycle or accessories then the eBay motorcycle section is the perfect place to look. You should look for eBay motorcycle listings of interest by taking advantage of the browse and search features. You can specify the make, model, year range and even color for your search within the eBay motorcycle section.

It is important to use the search functions to their maximum capability when you are looking for an item within the eBay motorcycle section. The more information you can put into your search terms the more likely you are to get the exact result that you want from the eBay motorcycle listings. For example, if

Motorcycle Cleaning

you are looking for a red Honda VFR you will get the most accurate results if you search for "red Honda VFR 750 2000" rather than simply entering "Honda VFR" which may well give you a listing including decals, spare seats, owners manuals and other items for every Honda VFR that has ever been built.

Another point to consider when you search the ebay motorcycle section is to specify the location that you want the motorcycle to be near. Any eBay motorcycle that you are interested in should be close to your home address so that you can go and see the motorcycle before placing a bid. This also makes collecting the motorcycle much easier. The search function allows you to specify that you want the eBay motorcycle to be within a certain radius of a town or zip or postal code.

The eBay motorcycle section is sub-divided into brands so it is a good idea to browse the appropriate category as you may find an item that you have never thought of. For example, if you look in "Honda" within the eBay motorcycle section you may well come across a framed print that would look great on your bedroom wall or a Honda team cap that you can wear when you take your motorcycle helmet off.

Most importantly, you need to be particularly cautious when you are searching for an item in the eBay motorcycle section to prevent you from being ripped off by unscrupulous con artists. On no account should you send an advance payment for any item in eBay motorcycle section. It is important to do your research and check the vendor's details and verify that the time for sale in the marketplace is legitimate.
