OWN YOUR BUSINESS, DO YOU HAVE WHAT IT TAKES?

By Garry Munro

I think it's fair to say that not everyone is cut out to be a successful Business Owner, now some of you maybe disputing this statement but hear me out.

I'm not saying that if you put a person in the perfect Business environment that they won't succeed but how often does the perfect Business environment appear?

Based on my own study and observations, as well as, the common themes that come through articles on my Minds Alike Blog Site (

www.mindsalike.blogspot.com

) I have put together a selection of the

various "things" that a person must possess to be a successful Business Owner:

- To be a successful Business Owner you must Believe that you'll succeed and have a Positive Attitude because there will be times when self doubt strikes, but if you believe that success will happen then the doubts will be overshadow by your positive attitude.
- To be a successful Business Owner you must be prepared to Risk everything, this is where many people give up because they are not prepared to take the risk that could end up with them losing everything.
- To be a successful Business Owner you must keep things Happening, if you're someone who procrastinates and cannot overcome procrastination, you'll never succeed.

OWN YOUR BUSINESS, DO YOU HAVE WHAT IT TAKES?

- To be a successful Business Owner you must Motivate yourself and not expect motivation to come from books, mentors, coaches or seminars, they can all help but when you wake up of a morning, it's all up to YOU.
- To be a successful Business Owner you must have a Passion for what you do, otherwise you'll not have the Desire to carry on once the hard times hit and there will be hard times, BELIEVE ME.
- To be a successful Business Owner you must Never Compromise on your Core Values, no matter what the payoff maybe, if you "trade in" your core values you haven't succeeded, You've Given Up.
- To be a successful Business Owner you must have Vision, you must be able to see how your business needs to develop and change in the future.
- To be a successful Business Owner you must seek the Assistance of Others unless you're someone who knows everything and can do everything yourself, which, as you know is not the case, we all need help to succeed.

As I said at the start, not everyone is cut out to be a successful Business Owner, some of the themes above can be taught but will they stick and become part of YOUR make-up?

If your answer is No, then sorry, but you don't have what it takes!

10 Questions: Do You Have What It Takes?

By John Assaraf

Do you have what it takes to be really successful?

Have you ever thought about what you must be prepared to endure and do in order to be successful in business or your career?

OWN YOUR BUSINESS, DO YOU HAVE WHAT IT TAKES?

I think I have been asked at least 5,000 times what it really takes to be successful in business, so I jotted down 10 questions you can use to gauge whether you already have what it takes, or if you need to do a little "work" to get there.

Many years ago I heard Jim Rohn say that you either pay the price of discipline or the price of regret. Discipline weighs ounces...regret weighs tons!

With that said, here are 10 questions to ask yourself: Are you disciplined? Do you take rejection personally? What about criticism? Do you bounce back quickly from making errors or failing over and over again? Are you a planner or do you do things by the seat of your pants? Are you prepared to take risks? Moderate or Big? Do you stay focused on one thing and one thing only until the result you want is achieved? Do you have the stamina to keep going long after everyone else is tired? Can you delegate well, or are you the only one who can do things right? Do you wait for things to happen or do you aggressively go after what you want? Do you do whatever it takes to achieve your goals or just what's convenient?

These questions are critical for you to ask yourself in order to get a true picture of your nature and behavior.

What I have found is that successful people are aware of the consequences of not being efficient in these areas, and find other ways, resources or people to manage for them.

Food for thought?
