## Playing Roulette

By Adel Awwad

For those who enjoy gambling on the game of roulette, playing roulette in an online casino can

prove to be quite enjoyable. Most online casinos do their best to simulate the sights and sounds of a land-based casino so that their customers can experience the excitement of real casino gambling. Play roulette in an online casino and you'll most likely see and hear the wheel spinning, the ball bouncing and landing, and even hear the drone of voices and the sound of slot machines all around you. It's easy to get caught up in the excitement of the game and forget that you are sitting at your computer!

Online roulette is played the same way as roulette in a land-based casino, except that you need to use your mouse to place bets and start the wheel spinning. A player has a choice of betting on one number, a set of numbers, whether the number will be red or black, or whether the number will be odd or even. The online casino will display certain amounts to bet, such as \$1, \$5, \$10, \$25, \$100, and \$500. You click on the amount that you want to bet, and then click the place on the board where you want to place your bet. For instance, if you want to place \$1 on number 33, then you first click on the \$1 chip, then click on the number 33 on the roulette board. After you place your bet, you click on "spin" and the round begins. You'll see the wheel spinning and the ball bouncing, and you'll be able to see right away where the ball lands when it stops. If the ball lands where you want it to, then you'll usually hear a voice saying, "you win", "player wins", and your credits will be increased by the appropriate amount.

Any roulette system that you think works well for you in a land-based casino, you can also use in an online casino. The software that online casinos use makes the end results of the roulette wheel spin just as random as the results in a real roulette wheel. You should note, however, that when online casinos give you free bonus credits for certain promotions, that most won't let you play roulette with the bonus, since many people have invented roulette systems that work fairly well in the bettors favor. If you are playing with money that you have deposited and are not using a casino promotion bonus, than you are free to play any game that you want, including roulette.

### **Roulette Tips**

#### **By BetPrize**

Roulette casino game, like slot machines, is a game of plain luck where no skill or strategy is able to influence its outcome. Every spin of the casino roulette wheel is totally independent of all previous spins. No mathematical formula can be applied to explain and to predict the unpredictable behavior of the ball on the casino roulette wheel. Do not expect one of the numerous "roulette winning strategies" would work for you simply because there is none!

But there is one strong theory that a roulette player can increase his chances by playing the single zero roulette. The European or French roulette casino game table has 37 numbers including zero, while the American roulette table has 38 numbers including zero and double zero. Casinos almost always have both types of roulette casino game tables. According to this theory, which some people claim has been mathematically proven, players should only play the French roulette gambling game with a single zero.

It should make their chances better by a few percent comparing to the American roulette casino game.

When you are going to play the French roulette casino game, ask if the casino uses the "En prison" rule which increases a player's odds. According to the rule, an even money bet (Red, Black, Odd, Even, 1-18, 19-36) that results in a spin of zero gets "imprisoned". If this imprisoned bet wins on the next spin, the original bet is released and returned to the player.

Casinos with the American roulette casino game sometimes use a version of the "En prison" rule called "Surrender". With this rule in use, player placing even bets only loses half of his bet on a spin of 0 or 00.

Try your luck, hope for the best and have fun!
