In this 'How-To' article I'm going to show you "A Simple System" that will generate "Extra" surge of targeted traffic to your website, FREE, by using Traffic Exchange programs(Viral Marketing), combined with a special browsing(surfing) software.

I think traffic exchange programs are a excellent source of quality traffic and are often overlooked by many marketers as being to time consuming.

I personally use them everyday, and that's one of the main reasons why I put this system together.

I wanted a way to 'Maximize' my efforts and more importantly, save myself time, and now I would like to share it with you.

I'll also be showing you how you can 'Maximize' your advertising on these networks by joining a few "Key" programs.

So let's get started. Go to Step #1.

(Note: You might find it easier to follow the steps if you print this article out.)

Psssst! I call it... "A Simple System".

=====

STEP #1:

The first thing you must do is download this program called Crazy Browser. Crazy Browser is a software that lets you surf multiple browsers at once. The software is free to download. Go to the address below and download Crazy Browser.

<http://www.crazybrowser.com/download.htm>

After you download, install it.

=====

STEP #2:

Now that Step #1 is complete, now you must go sign-up for one of the "Key" programs I had mention earlier. The program you are signing up for is a URL rotator. You will be using this URL rotator in the traffic exchange programs that you will be signing up for in Step #3.

Click the link below to get your rotator.
<http://www.ebizrotator.com/goto/CT3146.htm>

Once signed up you'll be given a unique URL for your rotator. Write it down because you'll need it for the next step.

=====

STEP #3:

Once you have finished signing up for your rotator, it's now time to sign-up with some traffic exchange programs.

There are 8 you must sign-up for. For each program sign-up you'll be asked for a URL. Make the URL for each of the programs your eBiz Rotator URL.

Psssst! I call it... "A Simple System".

Also, while your in your traffic exchange members area, be sure to Copy and Paste your 'Start–Page URL's' to a folder in your Favorites. Name it 'Traffic Programs'. You will need these later when setting up the browsing software.

Sign–up for the following:

1)Traffic Swarm:

<http://www.trafficswarm.com/go.cgi?164781>

2)HitPulse:

<http://www.hitpulse.com/jsp/index.jsp?ref=styles>

3)Fast Freeway:

<http://www.fastfreeway.com/index.php3?ref=84864>

4)No More Hits:

<http://www.nomorehits.com/cgi–bin/start.cgi?referrer=coryt>

5)SurfWake:

<http://www.surfwake.com/x/newuser.php?referer=styles>

6)Load Shark:

<http://www.LoadShark.com/index.php?ref=38431>

7)Start Frenzy:

<http://www.startfrenzy.com/default.asp?userid=styles98>

8)Clickaholics:

<http://www.clickaholics.com/cgi–bin/refer.cgi?21894>

(NOTE: If some of the links don't work, this is because some email programs only allow a certain amount characters to be displayed. Just copy and paste the URLs into your browser.)

Okay, you with me so far? Good. Let's go to the next step.

=====
* * * * *

STEP #4:

The next step is going to take a little longer then the others. What you're doing is signing up for the final "Key"

Psssst! I call it... "A Simple System".

program.

This program that you're signing up for is another rotator. The difference between this rotator and the eBiz Rotator is that its a "Site Rotator" inwhich you can program up to 40 URL's with different rotations.

You will be using this rotator in 3 of the 5 spots given to you with the eBiz Rotator.

Click the link below to sign-up with BuildReferrals.com.

<http://growyourbusinesswith.buildreferrals.com>

Once you have signed up with BuildReferrals.com you'll also be given a unique URL for your rotator. To find it, go to your members area and scroll down until you see a bunch of icons. Simply click on the one that says "Site Rotator".

Write the URL down the URL you're given on a piece of paper

because you'll need it for your eBiz Rotator later on.

Now this is optional at this point, but since your still logged in to your BuildReferrals.com account you can now choose what URL's you would like to promote in your site rotator. You don't have to use all 40, just start out with 5 to 10 and set there rotations to 1.

By setting it to 1, this means each URL will get a equal rotation.

How are your fingers feeling at this point? Are they sore yet?

Let's carry on to the next step.

=====
* * * * *

STEP #5:

This step is much shorter then the last one, I promise you that. All you have to do is login to your eBiz Rotator account, click on the "Free Rotator" button and input your

Psssst! I call it... "A Simple System".

"Site Rotator URL" from BuildReferrals.com in 3 of the 5 spots available.

You'll also be asked for a short description for your "Hot Links" on your eBiz Rotator. Try to make them universal to what is you are promoting within your "Site Rotator".

With the other two spots in your eBiz Rotator you can either put your own website address and with the other your BuildReferrals, referral URL. The option is up to you.

Now that you have done that, preview your eBiz Rotator and see how it looks because this is what your potential customers are going to see within the traffic exchange programs you signed up for earlier.

Pay special attention to your 'Hot Links'. Are they grabbing your attention?

Now for the final step.

```
=====
* * * * *
```

STEP #6:

Let's now go to the 'Crazy Browser'.

Once it's loaded, go to your 'Favorites' folder. Then go down to your 'Traffic Programs' folder that you created earlier and select the first traffic exchange start-up URL.

It should now be loading.

Now, simply repeat the process 3 more times until you have 4 traffic exchange programs running.

Now, go up to the 'Group' icon at the top of the browser. Within the menu, select, 'Save All Pages As A Group'.

Next, you will be asked to name the group. Name the group whatever you like(ex.Group 1), then save.

That's it.

Psssst! I call it... "A Simple System".

Now, when you want to run a particular group, all you have to do is go to your 'Group' folder and select your desired group, wait until you're credited for each exchange, then click the "Red X".

The "Red X" simply closes all the current windows that are open. It saves you from having to close them individually.

Now, just repeat the process.

Simple, isn't it.

You can make-up as many groups as you like, so you can 'Maximize' your exposure on different networks.

I hope you enjoy the simplicity of this system and benefit from using it.

Choosing A Forex Trading System - Part 5

By Tony Hosea

No discussion of trading system evaluation would be complete without a discussion of drawdown. We must always look at the maximum drawdown of any trading system as it is very, very important.

The maximum drawdown of trading system is defined as the greatest peak-to-valley drawdown in a trading system's equity. Let's say for example that we have a trading system that reaches a particular equity peak of \$100,000. Let's further say that two weeks later, the trading system equity is at \$80,000. In this example, let's say that the \$80,000 equity happens to be an equity valley. In that case, the peak-to-valley drawdown would be \$100,000-\$80,000 equals \$20,000. This means that the maximum drawdown is \$20,000.

So why is the maximum drawdown such an important measurement in our evaluation of a trading system? It's because the maximum drawdown gives us a measure of the survivability of the trading system. A simple measure, but a measure nonetheless. Basically, when we look at the maximum drawdown we can say that this maximum drawdown can happen again at any time throughout the life of the trading system. This is particularly important when it comes to evaluating starting account size.

As an example, let's say that you started to trade the system using an account funded with \$10,000.

Psssst! I call it... "A Simple System".

Right off the bat, you can see that this would not be prudent, because as we can see from our maximum drawdown figure if we went into a drawdown immediately after starting our account our account balance would logically be wiped out.

We can see from this quick illustration that we definitely need to fund our account with more money than enough to cover the maximum trading system drawdown. It makes perfect sense to have a buffer of some sort as well.

I would exercise caution, if you are looking a trading system and the recommended account size is the exact same size as the maximum drawdown.

The maximum drawdown is an essential measure that gives us a better idea of what to expect when trading a particular system. A comparison of risk versus reward is an absolute essential in successful trading.
