Scientists Declaration about The Holy Quran and Islam–Durja Rao

By Durja Rao

Scientists Declaration about The Holy Quran and Islam–Durja Rao by Durja Rao

Sheikh Zindani presented to Prof. Rao many verses dealing with his area of specialisation, and asked: "What do you think of the existence of the scientific information in the Qur'ân? How could Prophet Muhammad have known about these facts fourteen centuries ago?"

"It is difficult to imagine that this type of knowledge was existing at that time, around 1400 years back. May be some of the things they have simple idea about, but to describe those things in great detail is very difficult. So this is definitely not simple human knowledge. A normal human being cannot explain this phenomenon in that much detail. So, I thought the information must have come from a supernatural source."

"I find it very interesting that this sort of information is in the ancient scriptures of the Holy Qur'ân, and I have no way of knowing where they would have come from. But I think it is extremely interesting that they are there and this work is going on to discover it, the meaning of some of the passages."

And when he was asked about the source of the Qur'ân, he replied, "Well, I would think it must be the divine being."

"That is a difficult question which I have been thinking about since our discussion here. I am impressed at how remarkably some of the ancient writings seem to correspond to modern and recent Astronomy. I am not a sufficient scholar of human history to project myself completely and reliably into the circumstances that 1400 years ago would have prevailed.

Certainly, I would like to leave it at that, that what we have seen is remarkable, it may or may not admit of scientific explanation, there may well have to be something beyond what we understand as ordinary human experience to account for the writings that we have seen."

Scientists Declaration about The Holy Quran and Islam–Durja Rao

"I say, I am very much impressed by finding true astronomical facts in Qur'ân, and for us modern astronomers have been studying very small piece of the universe. We have concentrated our efforts for understanding of very small part. Because by using telescopes, we can see only very few parts of the sky without thinking about the whole universe. So by reading Qur'ân and by answering to the questions, I think I can find my future way for investigation of the universe."

Professor of Marine Geology teaching at King Abdulaziz University, Jeddah, Saudi Arabia.

Scientists Declaration about The Holy Quran and Islam–Joe Leigh Simpson

By Joe Leigh Simpson

Scientists Declaration about The Holy Quran and Islam–Joe Leigh Simpson by Joe Leigh Simpson

Author and editor of over 20 books, and has published over 181 scientific papers. Co–author of The Developing He is the President of the American Fertility Society. He has received many awards, including the Association of Professors of Obstetrics and Gynaecology Public Recognition Award in 1992. Like many others, Professor Simpson was taken by surprise when he discovered that the Qur'ân and Hadîth contain verses related to his specialised field of study. When he met with Sheikh cAbdul–Majeed A.Zindanî, he insisted on verifying the text presented to him from the Qur'ân and Hadîth.

"... these Hadîths (sayings of Muhammad) could not have been obtained on the basis of the scientific knowledge that was available at the time of the 'writer'... It follows that not only is there no conflict between genetics and religion (Islâm) but in fact religion (Islâm) may guide science by adding revelation to some of the traditional scientific approaches... There exist statements in the Qur'ân shown centuries later to be valid which support knowledge in the Qur'ân having been derived from God."

Professor and Chairman of the Department of Obstetrics and Gynaecology, Baylor College of Medicine, Houston, Texas, USA.
