100% Effective Natural Hormone Treatment
Menopause, Andropause And Other Hormone Imbalances
Impair Healthy Healing In People Over The Age Of 30!

Scientists Declaration about The Holy Quran and Islam–E. Marshall Johnson

By E. Marshall Johnson

Scientists Declaration about The Holy Quran and Islam–E. Marshall Johnson by E. Marshall Johnson

Author of over 200 publications. Former President of the Teratology Society among other accomplishments. Professor Johnson began to take an interest in the scientific signs in the Qur'ân at the 7th Saudi Medical Conference (1982), when a special committee was formed to investigate scientific signs in the Qur'ân and Hadîth. At first, Professor Johnson refused to accept the existence of such verses in the Qur'ân and Hadîth. But after a dicussuion with Sheikh Zindanî he took an interest and concentrated his research on the internal as well as external development of the fetus.

"...in summary, the Qur'ân describes not only the development of external form, but emphasises also the internal stages, the stages inside the embryo, of its creation and development, emphasising major events recognised by contemporary science."

"As a scientist, I can only deal with things which I can specifically see. I can understand embryology and developmental biology. I can understand the words that are translated to me from the Qur'ân. As I gave the example before, if I were to transpose myself into that era, knowing what I do today and describing things, I could not describe the things that were described..."

I see no evidence to refute the concept that this individual Muhammad had to be developing this information from some place... so I see nothing here in conflict with the concept that divine intervention was involved in what he was able to write..."

Professor and Chairman of the Department of Anatomy and Developmental Biology, and Director of the Daniel Baugh Institute, Thomas Jefferson University, Philadelphia, Pennsylvania, USA.

Scientists Declaration about The Holy Quran and Islam–Joe Leigh Simpson

By Joe Leigh Simpson

Scientists Declaration about The Holy Quran and Islam–Joe Leigh Simpson by Joe Leigh Simpson

Author and editor of over 20 books, and has published over 181 scientific papers. Co–author of The Developing He is the President of the American Fertility Society. He has received many awards, including the Association of Professors of Obstetrics and Gynaecology Public Recognition Award in 1992. Like many others, Professor Simpson was taken by surprise when he discovered that the Qur'ân and Hadîth contain verses related to his specialised field of study. When he met with Sheikh cAbdul–Majeed A.Zindanî, he insisted on verifying the text presented to him from the Qur'ân and Hadîth.

"... these Hadîths (sayings of Muhammad) could not have been obtained on the basis of the scientific knowledge that was available at the time of the 'writer'... It follows that not only is there no conflict between genetics and religion (Islâm) but in fact religion (Islâm) may guide science by adding revelation to some of the traditional scientific approaches... There exist statements in the Qur'ân shown centuries later to be valid which support knowledge in the Qur'ân having been derived from God."

Professor and Chairman of the Department of Obstetrics and Gynaecology, Baylor College of Medicine, Houston, Texas, USA.
