**Should Know About How To Air Bag Suspension**

**By Wirat Munpan**

The truck will lay frame on the ground via a air bag suspension. Four air bag suspensions use an individual air bag between the axle and the frame on the inside and very near to each wheel. the motorcycle main frame about a pivot axis, and an air-bag suspension unit. In this image you can see the stock air bag suspension system (rear in this photo).

That is a stock suspension using an airbag to pre-load the suspension. We stock many different brands of truck air bag suspension. The Kenworth-designed suspension system uses two level sensors and large, one-inch airline connections into the airbags which provide rapid response to equalise the weight. AT suspension system employs a long trailing arm in conjunction with an airbag and shock absorber. Looking for a truck air bag suspension. and an air-bag suspension unit. The air-bag suspension unit includes at least one air bag constructed of an elastomeric material. The air bag suspension results in the longest pavement life, while the walking beam suspension results in the shortest pavement life.

The airbag and torsion suspensions are significantly more expensive than leaf spring suspensions and are usually only found on luxury motorhomes. Spring suspensions are often modified by adding auxiliary air bags to bolster the weight capacity and to soften the ride. Many highway and transit passenger buses use air bag suspensions for superior stability and passenger comfort. Whereas with Kenworth AirGlide airbag suspension, the suspension levels out quickly, maintaining stability without affecting the vehicle. Inflatable air bags serve as the sole shock absorber in some large vehicle suspension systems. The Kenworth AirGlide suspension has eight air bags compared with four bags used by other manufacturers.

The Frieghtliner Chassis with air bag suspension delivers a smooth ride and excellent handling characteristics. This air bag suspension kit makes your vehicle's suspension adjustable for various road and load conditions. Order your air bag suspension kit today! The walking-beam suspension causes more dynamic load variation than the air-bag and leaf-spring suspension. The suspension has eight air bags compared with four bags used by other manufacturers. Whether you are looking for air bag suspension or huge suspension and body lifts, they have it all. This image shows the front suspension with the air bag removed. The following products are required: Full-tapered leaf springs,

## Should Know About How To Air Bag Suspension

add a leaf, shock absorbers and air bag suspension..... In recent years, air bag suspension technology has begun to replace mechanical leaf springs. Overall the industry has not had much success historically with air bag suspension because of their instability in agitator work. Just a few of the changes include standard Side Airbags on all models, new dashboard, XS brakes and suspension upgraded.

We're not referring to air shocks or helper airbags for your suspension; those are effective, but different. Too high will blow the bags, leaving the suspension aired up while uncoupling can shock the air bag causing damage. Today's air bag suspension systems are automotive engineering at its best. Given that you aren't ever supposed to exceed that, I installed a four-bag air suspension, just in case. And the components that affect it and it affects 94 seville air bagsuspension problem blew

## **Twenty Questions to Ask Yourself When Choosing a Sleeping Bag**

**By Maria B.**

Before you head out to buy a new sleeping bag, make sure you know exactly what you are looking for. When you answer these questions, you'll be better prepared to pick out the sleeping bag that is just right for you.

- How will you be using your sleeping bag? Will you be backpacking or hiking? Or do you just need a bag for a family camping trip?
- What time of year will you be camping? Will you be doing summer camping, spring through fall excursions, or rough winter camping?
- Consider your budget. How much do you want to spend? Can you save money by getting a higher quality sleeping bag on discount?
- Where will you be using it? Will you be sleeping in a tent? Out in the open? In a lodge or cabin? What areas will you be using the sleeping bag? Will it be in wet areas, dry deserts, mountains?
- What comfort level do you want? If weight isn't a consideration, do you prefer a roomier, softer, more comfortable sleeping bag? Are you accustomed to the cold night air or do you chill easily?
- Is the weight and compatibility important? Will you be carrying it for a long distance? Do you have limited space?

## Should Know About How To Air Bag Suspension

- How long do you want it to last? Would you prefer to get a cheaper one and replace it later? Or do you want a higher quality sleeping bag that will last many years?
- Is flexibility important? Do you need one bag to meet all your needs, summer through winter?
- How often do you intend to use it? Is this a once a year camping trip? Or will you be using it very frequently?
- Who will be using the bag? Man, woman, or child? What is their body shape?
- How much extra room do you like? Do you sleep still at night or do you tend to toss and turn a lot?

Be sure you consider all these aspects before you buy your sleeping bag. Then your new sleeping bag will be just perfect for you and your needs.
