Simply Simple – Simplicity Lawn Mowers

By A.Caxton

Simplicity lawn mowers are manufactured by Simplicity Inc. and are easy to operate with all the operator comforts. Read all about some of the models of this tractor manufacturer

Zero Turn Radius Tractors - Simplicity

The Javelin from Simplicity is one of the low cost zero turn radius tractor within the reach of everyone. The neat features of Coronet are well appreciated by everyone and liked by the drivers who have driven the lawn mower. The features briefly are

- * The price range of Javelin tractor is \$3200 to \$3899, which makes it an affordable lawn tractor
- * It can move at a speed of 6 MPH in the forward gear and 3 MPH in the reverse gear. It can operate at this speed and cut the grass evenly at this speed.
- * It incorporates a single piece frame that is tough and stable and takes riding shocks easily and without transmitting it to the driver
- * The ride is further dampened with front springs to give you a smooth ride.
- * The height of cut can be continuously adjusted through a 6-position lever. The lever is accessible to the operator from seat.
- * All the controls are so placed that they are available to the operator without extending hand and the seat is padded for greater operator comfort. There are twin lever controls that are within easy reach of the driver and convenient to operate
- * The metering console includes an hour meter so that the maintenance can be arranged as per time suggested by the manufacturer and then the equipment gives you a trouble free service
- * The tires are 18-inch diameter and this makes for a comfortable ride.

Simply Simple – Simplicity Lawn Mowers

- * The footrests are padded for additional driver comfort.
- * The three gallon fuel tank gives you sufficient range so that you can continue your work without bothering for refueling
- * The greatest advantage of this tractor is the ability to turn on a dime and that too with ease. The transmission is through Hydro Gear® EZT transmission for ease of driving and better control
- * The engines are from Briggs & Stratton or from Kohler and the horse power range is from 16 HP to 40 HP

The second lawn tractor from Simplicity is the Coronet Model. This model like the first one is also received well in the market. This model is smaller than the earlier one and gives 13 to 16 HP. It has all

the features listed above and in addition, the following features are available in Coronet

- * It features Ground Hugger™ design and Auto Leveller™ system for making sure that the cut by the lawn tractor is clean and uniform over the entire work place served by this lawn tractor.
- * It has 13 inch front and 16 inch rear wheel and 30 inch or 34 inch cutting width
- * Electric power take off is one of unique feature of this lawn tractor making it work as electric generator at far off placed in your garden
- * The turning radius is 12 inches compared to zero turning radius for Javelin
- * Like the javelin you can continuously adjust the height of cut through Dial-A-Cut™ adjustment of height

So you can see that both models of Simplicity Inc stand up to their names very well.

Easy Working With Cordless Lawn Mowers

By A.Caxton

Description on cordless electric lawnmowers. Have you got any question on cordless lawn mowers?, just read this article and you will learn the bases on these new innovative lawnmowers.

Most cordless electric lawnmowers have ups and downs on the mowers market. It is due to these specific lawn mowers have experienced so many breakdowns in the last years. Customers are dissatisfied upon electric lawnmowers even though the idea is really brilliant. Several companies invested in making cordless lawnmowers such as Ryobi, Black & Decker and Toro manufacturers . But they have discontinued manufacturing those models because of slow demand.

Most electric work with 24V NiCad lawnmower batteries. They are able to keep working between 1 up to 2 hours for specific models. The main advantage of cordless, is that we don't have to deal with the hassle of dragging around an extension cord. This becomes a big problem when we work on relative big yards. Therefore, they performs properly on the field without cords.

On the other hand, there exists similar but at the mean time much more different lawn mowers, corded electric lawnmowers. They are actually less expensive than cordless electric lawnmowers due to the battery is missed. They are plugged in at all time, this is the most important disadvantage. We have to deal with the cord, trying to drag it around.

Robotic and electric lawn mowers

Nowadays, innovative lawn mowers are being designed by leading electric lawn mowers manufacturers. Robotic lawnmowers, are basically cordless mowers. We can leave them alone over the grass and by just setting up a positional system, the robot will mow the grass while we are watching TV, isn't it perfect?All in all, we don't recommend in buying these lawnmowers, even though they are on the market, we think that they still are just prototypes.
