Noise in the Workplace

By Chris Hampton

The Cause:

Machinery, people and the environment all contribute to noise in the workplace.

The Facts:

The Solution:

Splitting the Heat and the Noise

Reduce or eliminate the noise, either at the source or after the fact.

Methods:

There are three major methods of sound reduction and control.

Masking is the use of sound to cover up the unwanted or annoying noise.

Absorption is the use of sound absorbing or sound energy conversion material to lessen noise.

Deflection is the use of sound reflective material to direct the excessive noise away.
