Summertime bugs and creepy crawlies.

By Wes Crystal

Summertime bugs and creepy crawlies. by Wes Crystal

Well it is almost that time again. Time to get out the garden tools and start planning your next great garden project. It is also that time of year for all those pesky bugs and crawly critters too! You don't have to go on a picnic to discover ants are making themselves a nuisance in your life... and these days; many of us hesitate to use chemicals to get rid of them. Now there is a non-poisonous way to kill ants. I've got a magic formula. Come on, I'll show you. All you need for your magic formula is:

2 parts molasses
1 part sugar
1 part dry yeast

The molasses and sugar attract the ants, and the yeast causes them to swell up and explode. So we'll mix it up, and you'll see how easy it is to take care of those ant problems. Now we're using tablespoons as our parts. If you have a big ant colony, you will want to probably use cup fulls.

That'll really attract them. Add your molasses, sugar, and yeast powder. Then what you do is just mix it up real well. When you get it mixed, you're ready to go outside and go to work against those ants. Now normally this is a formula that attracts sugar ants, so you'd use it inside, but we don't have any ants inside the house. We found some outside here. What you do is just drip a little of this on a card, and then you put it down where the ants will be attracted to it. In this case we're going to go down to the ant bed, and, as you can see, they're already starting to come out here. And once they eat it, the yeast gets inside, it causes them to swell up, and you end up with a whole bunch of dead ants.

Incidentally, if you have fire ants, there's a non-toxic way to get rid of them, and that's to use grits. Just pour the grits over the mound, and when you do that, they will come in and they'll eat the grits and it'll cause them to swell up, and they'll explode too.

Roaches can be a little harder to get rid of. The following formula is a little more aggressive and care must be taken around children, animals, and pets! Mix the following ingredients together for a powdered poison for roaches.

Summertime bugs and creepy crawlies.

- 4 Tablespoons Boric acid.
- 2 Tablespoons flour.
- 1 Tablespoon cocoa.

Sprinkle the formula near the entrance, where the critters are coming in and let it do its stuff!

Ok. How about them pesky mosquitoes! Here is a good thing for summer, for those who like to enjoy the out of doors, but don't like those pesky critters. Put some water in a white dinner plate and add just a couple of drops of Lemon Fresh Joy dishwashing soap. Set the dish on a porch or patio. Not sure what attracts them, the lemon smell, the white color, or what, but mosquitoes flock to it, and drop dead, or fall into the water, or on the floor within about 10 ft. Works just super! Enjoy a mosquito free

summer!

I'm sure that by now you have worked up quite a thirst. I know I have so lets make a Sonic cherry limeade! It is real easy to do. Ingredients:

- 1 cup Sprite
- 1/4 cup cherry juice (Libby is good)
- 2-3 lime wedges (each 1/8 lime)

Pour sprite into a glass over ice. Add the cherry juice. Now add 2-3 lime wedges, squeezing slightly before dropping each one in.

Now would be a good time relax, take a break and look at all the new home and garden decorations, bird houses, and bird feeders we have added at WolfCreekGifts.com. We have a great hammock on sale that is perfect for relaxing in with your ice cold cherry limeaid. Enjoy!

Wes and his wife Robin enjoy running Wolf Creek Gifts & Trading Co. and WolfCreekGifts.com from their home in beautiful Colorado near the foothills of the Rockies. We would like to thank everyone for all of their support.

Cheap African Vacations

By Ian Smith

The words Cheap Africa Vacations don't really make sense, so why did you search under these three words?

If you think about it logically, the word 'cheap' has come to mean poor quality, when really what you want is quality that is inexpensive!!

The question now is, do you know anything that is cheap, but is good quality, so don't think you can get Cheap Africa vacations that are also high quality!!

Summertime bugs and creepy crawlies.

The next point is Africa – you need to be more specific – after all Africa is a very large continent, with huge differences in scenery, climate, and cultures, so where in Africa do you really want to take a cheap vacation?

Consider this – Africa takes in Morocco, Tunisia, Egypt, all different in themselves, but vastly different to Botswana, Tanzania, Zambia, Kenya, which are themselves different to South Africa.

We must add to this list, the offshore islands of Zanzibar, and perhaps The Seychelles, and Mauritius, although it would be easy to argue they belong to The Indian Ocean, and wouldn't qualify as somewhere to go for a Cheap Africa Vacation.

Finally from the three words Cheap Africa Vacations, we must take the word 'Vacation'.

What does a vacation mean to you, because the success or failure of your hard earned break depends entirely on your family unit all being happy with the same kind of vacation.

You may think a safari would be amazing, but how do you feel about tents, creepy crawlies? Do you want to spend time looking at ancient treasures and tombs?

Are you basically a bone idle beach bum, at your happiest with a good book and a cool refreshing glass? How about the noise, and smell and adventure of the 'souk' with lots of hassle and excitement? Is sophistication necessary for enjoyment?

Be in no doubt the continent of Africa offers a great variety of vacation opportunities.

>From Egypt on the northeastern coast to the game reserves of Kenya, Tanzania and South Africa, there is something for everybody. The most popular tourist areas are those bordering the Mediterranean Sea on the northeastern coast, such as Tunisia, and Morocco, then the islands of the Seychelles.

An area of increasing popularity in South Africa is a wine tour. At the opposite end of the continent several thousand miles away, Egypt is home to countless antiquities. A visit to Africa should be made with great care, as it is too large to tackle in one trip. You need to focus on a region and allow enough time to adequately see that area of the continent.

Ian Smith writes on Vacations, and he is passionate about finding new places, unknown hotels, and travelling independently. He contributes to
