**The Best Ways To Test Out A Luxury Car**

**By Gray Rollins**

Luxury cars offer drivers the smoothest, most comfortable rides and have some of the most

advanced engineering of any vehicles on the road. Many drivers and passengers alike wish that they could experience these beautiful driving machines, but only a select few people can count themselves lucky enough to own these exquisite cars that cost quite a pretty penny. If you are contemplating the purchase of a luxury car, you will want to be certain that your money is well spent.

Although there are plenty of consumer guides to luxury cars that can give you important information about things like safety statistics and gas mileage for various models of cars, there are a few things that no guide can tell you. Some of those things include which luxury car's design is most suited to your driving style; which car's controls will be the most intuitive for you to use; and which car will be the most satisfying for you to drive. This means that you will want to spend some time behind the wheel of your luxury car of choice before you sign on the dotted line.

There are two ways to try out a luxury car before you buy. One is to take a test drive, and the other is to take out a short term rental on the car you are considering purchasing. Each of these choices has its own advantages and disadvantages. A test drive is free, which makes it more attractive to many drivers. A rental can cost quite a bit of money, even if you only rent the luxury car in question for a week or a few days. However, a test drive is rarely more than half an hour long, which can severely limit the kind of experience you can have in the car you are considering the purchase of. A rental offers a longer time frame that will allow you to really get to know the ins and outs of your potential car, allowing you to make a truly informed decision. With a rental, you will be able to travel the streets you normally traverse through the course of your day. This will give you a realistic picture of what it would be like to navigate and park with the luxury car you are contemplating.

Although in this way a rental is highly preferable to a test drive, a rental isn't always a practical or possible choice. Often, consumers who are comparing different luxury cars are interested in the hottest, newest cars on the market. These kinds of vehicles are often in great demand, which means that they are not likely to make it onto the lot at your local rental outlet. In these cases, try to get your dealer to allow you a longer test drive than the average customer. Occasionally, a salesperson will be willing to let you try a luxury car for up to twenty four hours. So even if a rental isn't an option, you may

### **Test Driving A New Car**

**By Kevin Schappell**

One of the most important steps in buying a new or used car is the test drive. You can do all the research you like, but it all comes down to the test drive. Driving the car must be comfortable, easy, and enjoyable. Follow these few steps and get the most out of your next test drive.

Check over the car before you leave the dealer's lot. Tires, fluids, and lights should all be checked before you drive. Also make sure there is gas in the car.

If at all possible go on the test drive by yourself. You need to concentrate on the driving experience and the noises of the car. A babbling salesman will distract you and not let you get a good read on the car.

Before leaving the lot, adjust the seat, mirrors, and the climate control system. You do not need to be distracted while driving an unfamiliar car. Make sure you are comfortable and have a good view of everything around you.

Drive a variety of roads. Mix it up with some city driving followed by highway if you can. You should make sure to try every gear and reach highway speeds to fully test the car.

Test the brakes. The steering wheel should not shake while applying the brakes. Also, check to see if the car pulls to one side while braking. Squeaks and rattles could also indicate worn pads.

Notice how the car tracks. When you take your hands off of the wheel, which way does the car go? If the car consistently tracks to one side, be concerned about the alignment.

The last thing you should check is how you feel about the car. Did you enjoy driving it? Was there enough power to get your blood pumping? Is this a car you can live with every day? Most important don't get caught up in the moment, don't buy the first car you see, and never ever let the dealer think you are interested.
