The Non – Spatial Natural Selection (NSNS) or The NSTP Theory of Evolution

By Dr Kedar Joshi

The Non – Spatial Natural Selection (NSNS) or The NSTP Theory of Evolution by Dr Kedar Joshi

Some Background –

'To suppose that the eye, with all its inimitable contrivances for adjusting the focus to different distances, for admitting different amounts of light, and for the correction of spherical and chromatic aberration, could have been formed by natural selection, seems, I freely confess, absurd in the highest possible degree. Yet reason tells me, that if numerous gradations from a perfect and complex eye to one very imperfect and simple, each grade being useful to its possessor, can be shown to exist; if further, the eye does vary ever so slightly, and the variations be inherited, which is certainly the case; and if any variation or modification in the organ be ever useful to an animal under changing conditions of life, then the difficulty of believing that a perfect and complex eye could be formed by natural selection, though insuperable by our imagination, can hardly be considered real.'

– Charles Darwin, On Natural Selection

'Natural selection is the blind watchmaker, blind because it does not see ahead, does not plan consequences, has no purpose in view.'

– Richard Dawkins, The Blind Watchmaker

The Non – Spatial Natural Selection (NSNS) or The NSTP Theory of Evolution

Darwinian theory of natural selection is not a complete theory of evolution, rather far from it. There is, in addition, yet a dramatically different kind of natural selection where the non – spatial universal intelligence (or software) modulates the (conceptually) spatial species (or structures) and consequently selects them in order to execute the plan of design. The Darwinian natural selection is Spatial Natural Selection (SNS), while the later one, being a specific case or application of the NSTP theory, is Non – Spatial (Computational) Natural Selection (NSNS), which should now be called as Joshian Natural Selection. NSNS, through its idea of non – spatial computational intelligence creating orderly spatial illusion, answers the hardest biological problems such as the problem of cell

The Non – Spatial Natural Selection (NSNS) or The NSTP Theory of Evolution

development and differentiation () or the problem of newly minted protein settling into the correct shape (), which the Darwinian theory of evolution, or, in general, the SNS completely fails to answer. And it is very clear that the Joshian (Non – Spatial) Theory of Evolution is at the heart of evolution, not the Darwinian (spatial) theory of evolution. In effect, the Darwinian theory of evolution is severely incomplete and hardly, if at all, answers how life develops.

The watchmaker is not blind but extremely intelligent, powerful, and a great foreseer.

– Joshi

What is life ?

– Erwin Schrodinger

From the NSTP theoretical perspective life is of two kinds :

1) Pseudo life – As space is a form of illusion to non–spatial mind, all spatial entities have pseudo life.

2) Real life – As feelings/consciousness is real/physical/material, all conscious entities, like I, have real life.

ROS (Rehabilitation of Occult Sciences) : Astrology, Numerology, Telepathy

By Dr Kedar Joshi, PBSSI

ROS (Rehabilitation of Occult Sciences) is a component of Superultramodern Science (SS). Through the NSTP (Non – Spatial Thinking Process) theory and other components of SS, like Superultramodern Scientism (SSism), sciences (which, at present, are not generally regarded as sciences) like astrology, numerology, telepathy could be rehabilitated (or scientifically supported). Current (i.e. modern/ultramodern) science is incapable of explaining the mechanism behind the natural workings entailed by these sciences; For example, how stars govern human condition. Through the NSTP theoretical perspective the universe is an ordered non – spatial program, and stars and planets (in case of astrology) stand out or designed as indicators (rather than cause or source) whose appropriate scientific interpretation could predict the future upto certain extent. The inventor of ROS (Dr Kedar Joshi, i.e. myself) has, through systematic experience, come to believe in (Vedic) astrology and numerology. (Though not sure about telepathy.) Understanding of the NSTP theory is sufficient for the understanding of how these occult sciences could be supported by the NSTP theory.

The Founder as well as the President of British Superultramodern Scientific Institution (BSSI)

ROS (Rehabilitation of Occult Sciences) : Astrology, Numerology, Telepathy

Superultramodern Engineering (SEng)
Superultramodern Religion (SR)
Joshian Conjectures (i.e. Superultramodern Scientific Conjectures)
The Superultramodern Scientific Explanation of the Fundamental Forces
