The Sky & The Earth

By Mohammad Ali Abid

The Sky & The Earth by Mohammad Ali Abid

In Quran Allah says, "It is He who hath created for you all things that are on the earth; Moreover, his design comprehended the heavens, for he gave order and perfection to the seven firmaments; and of Allah things he hath perfect knowledge [2:29] in other Quranic verse he says, "Moreover, He comprehended in His design the sky, and it had been as smoke" [41-11]. The earth was already created and that there was a stage of the sky stages which has been as a smoke. This the word of Allah which the science is confirming now. If anybody wants evidence, he can go to any the of telescope and see by his own eyes. He will find smoke in the sky. The remaining of the smoke is still contributing in the formation of stars and planets. If we ask a simple man or an educated man, is the smoke results of fire or the fire results from the smoke? Naturally, he will reply by saying that smoke results from fire. Then can any body think that planets and stars were, once upon a time, smoke? Can any body think that fire was once smoke? Nobody will think about it. But it is confirmed by the holy Quran "Moreover, he comprehended in his design the sky, and it had been as smoke, he said to it and to the earth `come together, willing or unwillingly' they said: `We do come (together) in willing obedience" [41-11] When the earth entered the process of formation, the scientists say that mountains came out from the depth of the earth by the process of volcanoes. Different mountains came into existence by the activities of volcanoes which throw out the materials of mountains. Examine the meaning of this Quranic verse which says, "and when the Earth is flattered out, and casts forth what is within it and becomes clean empty" [84:3-4] Has the earth castled forth what is within it before or after its formation? In other words, the mountains which have been mentioned in the Quranic sign "And the mountains hath he firmly fixed" [79:32] are formed by the process of casting forth. The Earth castled forth the mountain and then the water of seas, oceans and rivers have come out of the earth itself. The air with its components and the rich soil all were in side the earth. The Earth easted forth all these materials to its surface. Quran says "What! Are the more difficult to create or the heaven (above)? (God) hath constructed it: on high hath he raised its canopy and he hath given it order and perfection. It is night doth He Endow with darkness and its splendor doth he bring out (with light). And the earth, moreover, Hath he extended (to a wide expander) he draweth out therefrom its moisture and its pasture. And the mountains hath he firmly fixed" [79:32]. The above verses show the abundance of boons bestowed by Allah upon those who live on earth. But after this display of abundant boons, the verses which follow them states "Therefore, when there comes the great, over whelming (event). The

The Sky & The Earth

Day, when Man shall be placed in full view for all to see" [79-34-36] if we examine all these Quranic verses told us many facts. Some of these facts are confirmed by science now as admitted by contemporary scientists. Scientists studies the sky and the earth and found many facts which were already mentioned in Quran before fourteen centuries. They realized the truth contained in these verses after studying the earth, its creation and the beginning of the creation of its resources, and as they realized the truth of the process of the beginning if the earth creation they must realize the truth and the significance contained in the Quranic signs which display the process of the end of the creation, as it is mentioned in the second part which says, "Therefore, when there comes the great, overwhelming (event). The day when man shall remember (all) that he store for" when all of us, me and you, remember what we have done. Every one will get his dues. Quran goes on saying "then, for such as had transgressed all bounds, and had preferred The life of this world, the abode will be hell-fire and for such as had entertained the fear of standing before their Lord's (tribunal) and had restrained

(their) soul from lower desires, their abode will be the Garden" [79:37-41] Since we scientifically found the truth of the first part of the above Quranic verses, then we will definitely face the truth of the second part of Quranic signs which tells about the end of life and the emergence of Hell-fire and Garden, the transgressor of all bounds and the obedient who obey Allah. Then, every one is free to chose but he has to bear the consequences of his choice. Inside our earth there is a continuous inflammation, hot currents, melted rocks and minerals etc. it heat and turmoil are in a continuous movement. But the heart of earth, which is in a continuous turmoil as a result of its hot content, is covered by a thick and wide crust which tries to control the hot content within the heart of the earth. The thickness of this crust which act like a slab spreading - out on the surface of the earth and makes the earth livable as well as protect us from its hot inner content, its thickness is about seventy kilometers Allah provides us with means of livelihood on Earth and protected us from its hot content. The natural response which we should adopt is to worship and obey Allah. Look at this Quranic verse' "O ye people! Adore your Guardian Lord, who created you and those who came before you, that ye may have the chance to learn righteousness; who has made the earth your couch" [2:21-22] Allah spread-out the Earth crust and made it as a slab, a mat that makes life on earth easier. Quran shows us the process of earth creation. It explained before fourteen centuries, but modern science has realized it only before a decade. Source: "Science is the path for faith"

Satellite TV – Whats The Options?

By Mark Barnes

Well, there are several options available to viewers, depending on your requirements. You have the choice of Sky Digital, Fixed European Satellite & Motorised Satellite Systems. But in this article, were going to cover Sky Digital and the benefits it provides the viewer compared to the old analogue.

So, Why Sky Digital: As opposed to the old analogue system, where you had to have a 60cm satellite dish installed, Sky Digital is now available through what is called a `mini-dish', which is much less of an eyesore as the conventional system.

The Sky & The Earth

Furthermore, Sky digital will cater for all audiences, from entertainment channels with comedy and drama's, movies including latest releases, music channels for you to keep up to date with the latest chart releases, or listen to your favourite genre, then there's the radio stations, cartoon channels and news/documentary stations. There is a whole list of channels, available on different packages ranging from £15 to £42.50 (not including additional premium channels) per month.

What else can Sky do? Well, there's

The Interactive Services: The interactive services provided by Sky (telephone connection required and charged at a per minute rate) give the viewer the option to purchase goods through their Sky Digital Receiver.

By using the remote control, you will access the interactive services page, and then can choose whether to go shopping for goods, from a range of stores you can find on the high street and online, so you'll never have to leave your sofa again!

If your not interested in shopping but after entertainment, there are a range of games available to play, as well as competitions to participate in, a friends & dating section, and also a health and lifestyle section providing information on a wide range of related issues. You can also check availability and what's on at your local cinema!

The Sky+ & Multi Room Systems: Ever wanted to watch a film when another film you wanted is being shown at the same time on a separate channel? We all have, and it is frustrating, having to choose which of the two your going to watch.

Well, with Sky+, you'll have that problem no more. You can keep up-to-date with your favourite soap, and record another programme at the same time, and it will be stored in your Sky+ receiver's Hard Drive for viewing later. No more will you and your partner have to argue on who is going to miss their programme this week!

Sky+ also gives the viewer the ability to pause what you're watching. No, not just the recording, but what your watching in 'real time' can be stopped. So, when you receive those annoying sales calls in the middle of the night, and your just getting into your film and don't want to miss any of it, you can now hit pause, answer the call then get back to film and carry on where you left of! Then when the film is ended, switch back to real-time to carry on viewing as normal.

With Sky+, an upgrade to your dish will have to be made, and a new receiver will have to be installed, which will have an integrated hard drive to record your programmes.

With the dish upgraded, you will also be able to have your existing box moved to another room in your property, so if your family want to watch cartoons, and your more interested in a film or the news, you can watch both, at the same time, in separate rooms (additional monthly fee's will apply). This is called Sky Multiroom.

This can be extended as much as you want, providing you have the correct equipment installed.

The Sky & The Earth

Freesat From Sky: Not want to pay a subscription, but still want Digital TV channels? Why not opt for the Freesat service available from Sky.

Very similar to a normal Sky system, but you don't have to pay a monthly subscription, and will get a number of free digital channels (approximately 200) for your viewing pleasure.

Sky HD: Sky HD is 'High Definition' Television broadcast from Sky. Not familiar with HD?

HD or HDTV is the latest generation of digital TV, providing life-like picture quality, at least four times superior to current standards. It will provide extremely clear and fine picture detail with richer colours, improving the visual experience.

At launch, HDTV is thought to be available from Sky. In order to view programmes broadcast in 'High Definition', a soon to be released HDTV Sky Receiver with Sky+ technology will be required. In addition, the benefit of High Definition will only be apparent through a HDTV television (ideally plasma or LCD).

Please note, not all Plasma & LCD televisions currently available are HDTV compatible. It is expected to become available in the first quarter of 2006.

Aerials & Satellites are one of the UK's largest TV Aerial &

Satellite TV Installation Companies, providing a rapid and professional service, seven days of the week. Please visit our website for further information.
