Are You a Wildflower?

By David Leonhardt

Wildflowers grow from mere dust to reach their full potential.

Wildflowers grow well, even in adverse soil conditions.

Wildflowers don't require late nights at the office to grow.

Wildflowers grow thick and stick together.

Wildflowers grow strong and tall.

Wildflowers display their brilliant personalities for all to see.

Wildflowers withstand drought and grow all the more beautiful when watered.

Wildflowers withstand frost and hale.

Think and Grow Well

Wildflowers last late in the season, when other flowers have given up.

Are you a wildflower?
