Tips For Finding A U.S. Immigration Attorney

By Peter Sterling

Each year, millions of individuals want to migrate to the U.S. They are admitted into the United

States because mainly of their legal preferences, individual qualifications and absolute determination in working through with the U.S. Immigration law requirements.

U.S. immigration law by far, is very complex comprised of regulations, formal laws, previous decisions as well as other unstable information providing set patterns and guidance.

Since there is so much information on U.S. Immigration law to cover, you can either pass through that puzzle yourself or save considerable time and disappointment by hiring an immigration attorney so to help you get through the way.

It is very practical to hire the services of an immigration attorney for three main reasons:

Immigration U.S. law is in fact a complicated area of U.S. law that comes second to U.S. tax law in complexity.

It is constantly changing and hard to follow even for a number of immigration lawyers.

Immigration lawyers will be very helpful in ensuring that your immigration application get through the immigration bureaucracy quickly and smoothly.

The most excellent way to hire a good and reputable immigration attorney is research carefully before deciding.

Here are tips for finding a U.S. immigration attorney:

1. Make certain that your prospect lawyer is an American Immigration Lawyers Association or AILA member. An AILA lawyer will guarantee you that he or she has access or way in to the remarkable flow of necessary information to follow through on the continuous change in U.S. immigration law.

Tips For Finding A U.S. Immigration Attorney

2. Ask how your immigration attorney will charge you. If he or she charges hourly, what is your attorneys estimate of her professional fees so to do your case? If she charges a flat rate, ask what precisely does that exclude or include?

For instance, if your original request is denied and your attorney needs to file an appeal, will this be incorporated in her flat rate?

3. Ask how much work experience does your immigration attorney have?

Like other lawyers, immigration attorneys also specialize. Some in asylum, matters in business immigration or removal cases. Never hire an immigration lawyer who is specializing in asylum cases to handle his first business visa application at your expense.

4. Check your attorneys MartindaleHubbell rating. Note that MartindaleHubbell generally rates

attorneys basing on ethical standards and legal ability. Their highest rating is the AV rating.

5. Call the attorney for an interview. If she is reluctant to take time the time to have a talk with you, therefore she is not likely to respond to questions that you might want clear answers and to any of your problems when dealing with your case.

6. Consult your attorneys website or directly ask him what percentage in his years of practice is solely devoted to immigration matters.

7. Ask your attorney for recommendations from contented clients. Call her clients in order that you can consult with them how the attorney handled their case and whether or not they are pleased with her service.

A note to keep in mind, generally the best attorneys are busy individuals, because they are attending to a lot of clients and their attention usually first goes to their clients legal needs.

Expect that you should pay your lawyer for his knowledge, experience, training and for his time as he listens to the information of any situation that you convey to him as well as for his advices.

Like any other profession, note that the best attorney generally charge the biggest fee, whether it be flat rate or hourly fee. Of course, an attorneys rate must not be the only criteria or gauge in determining whether you are hiring the right or the best attorney.

More importantly, you need an attorney whom you are very comfortable or at ease working with as well as whom you believe will handle your immigration case with diligence and expertise.

COSTS OF ILLEGAL IMMIGRATION

By United Citizens of America

COSTS OF ILLEGAL IMMIGRATION by United Citizens of America

Illegals Cost Feds \$10 Billion a Year; Amnesty Would Nearly Triple Cost

The Center for Immigration Studies (CIS) has just released a new report, "The High Cost of Cheap Labor: Illegal Immigration and the Federal Budget." The report estimates that households headed by illegal aliens used \$10 billion more in government services than they paid in taxes in 2002. C-SPAN covered the release of the new CIS report last week, but it has not re-aired the coverage since then.

WASHINGTON (August 25, 2004) — A new study from the Center for Immigration Studies is one of the first to estimate the impact of illegal immigration on the federal budget. Based on Census Bureau data, the study estimates that households headed by illegal aliens used \$10 billion more in government services than they paid in taxes in 2002. These figures are only for the federal government; costs at the state and local level are also likely to be significant. The study also finds that if illegals were given amnesty, the fiscal deficit at the federal level would grow to nearly \$29 billion.

The study, entitled *The High Cost of Cheap Labor: Illegal Immigration and the Federal Budget*, is online at <http://www.cis.org/articles/2004/fiscal.html>
