VoIP Communications Joins Escape International as Representative of Team Manager

Making calls and talk to me with Voice over Internet Protocol (VoIP) becomes the newest communications provider

Published: December 6, 2004, 9:45 PM PST

By VoIP Communications Show "Talk To Me With VoIP" With Nate Perkins,
<http://www.nateperkinslive.com>

Atlanta start-up VoIP Communications with Escape International and 8x8, Inc. (Nasdaq: EGHT), the Packet8 Voice over Internet Protocol (VoIP) and videophone communications service provider, announced the availability of its DTA Broadband Phone Adapter and DV 326 Broadband VideoPhone at VoIP Communications <http://www.voippacket8.net> with Escape International Company: <http://www.escapeinternational.com/>, whose broadband VideoPhone service with Freedom Unlimited U.S & Canada Video calling broadband software lets anyone become a small-scale Internet business provider, Virtual Office hosted PBX Services and a Home-based business, the Founder, Chairman and CEO of VoIP Communications, Nate Perkins, says it's close to letting people create their own miniature phone networks as well as a small home business.

The Packet8 DTA adapter and VideoPhone will be featured at Voippacket8.net's online store, a component of its web-based information portal designed to provide consumers with a comprehensive guide to understanding Internet telephony. The latest chapter in the life of local entrepreneur Nate Perkins us VideoPhone, a Stockbridge outlet for the new Voice over Internet Protocol picture phone. Perkins, with 24 years in military telecommunications, received a MASTER in Information Technology

(IT) from University of Texas, Killeen, Texas, a disabled–combat retired Army colonel and Republican activist, has closed another Stockbridge business and his Art Outlet in Riverdale to concentrate on sales of the Packet8 phones from Escape International. The phones allow subscribers to see each other as they speak. The number Voice over Internet Protocol (VoIP) households is expected to mushroom to 18 million by 2008 as service quality increases, already inexpensive rates continue to drop and more homes get broadband, which VoIP operators usually require.

Because the 9 Nov, ruling the Federal Communications Commission has decided not to have the states limited to regulate the new technology, there's a chance for small businessmen like me to compete with the big companies, which will serve to keep the prices down for Voice over Internet Protocol services.

VoIP Communications' unique VoIP Packet8 service, Packet8 VoIP Phone Adapter service introduced a few months ago, lets someone buy, install, maintain, operate and resell high–speed Internet service

using Packet8 VideoPhone service, which are commonly used to with a high–speed internet connection (DSL, cable) or with a DSL or cable router and a Packet8 VideoPhone and Packet8 Phone Adapter dispense high–speed Internet inside millions of schools, homes, offices, hotels and motels, retail outlets, public areas airport ports, transportation hubs and states–wide Homeland Security Act.

With the Enhanced 911 (E911) broadband AMBER Alerts states emergency communications service plans. VoIP Communications, highly recommend that our company broadband VideoPhones (business or home phone) will offer and add greater, cheaper and faster Internet Phone Service with Voice over Internet Protocol that the states receiving broadband AMBER Alert notifications via their VoIP phones just like e–mail and electronic text messages. VoIP Communications service would add an order of magnitude of functionality to security his offering. Initial deals for the customers include (2) two month's free service free activation and rebates on the phones he will offer for about \$250 during the holidays. VideoPhone price starting at \$19.95 to #34.95 plus \$3.00 for the E911 service if or when your states install the E911 network.

VoIP technology "We're moving fast" to start supporting Voice over Internet Protocol), a way of making phone calls over the Internet, www.VoIPPACKET8.NET web site claims. This way, broadband Internet networks, also known as "VoIP communications," could serve as a kind of giant online pay telephone booth, the resprestaive company says. Its soon–to–be potent mix of Wi–Fi, VoIP and open–source software that works on just about any Wi–Fi router "help (s) break the monopoly of regulated data and voice communications," a company spokesman said. "He has hired 25 home–based sale people already, he added, and plans to hire up to 3,000 in the Metro Atlanta and nationwide in the next several weeks to come". Perkins informed his staff, "that this is how we are going to put American back to work, people who have suffered from traditional companies layoffs and economic ups and downs". While some entrepreneurs will probably use the Packet8 phones to turn their homes into small–based business, VoIP Communication's founders believe the initial market will predominantly be businesses run out of homes, or small companies looking for any competitive advantage they can get.

We here at VoIP Communications are another example of the changing face of the telephone industry. A decade ago, nearly every phone call at one point use the expensive, privately owned and heavily taxed and regulated local phone network. But VoIP technology allows the same calls to use the Internet—a haven from taxes and regulations— that makes them much cheaper, and Packet8

(www.VoIPPACKET8.net). See Atlanta Journal–Constitution cover story "Ask Clark Howard", dated 16 November 2004, paged IE3. Listen Clark Howard's radio show 1–4pm Mondays–Fridays on WSB–AM (750). Have questions about VoIP? Visit www.ajc.com/buyersedge

Traditional telephone operators first used VoIP technology to cut down on their own costs. Two years ago, commercial services such as Vonage helped seed the market for using a broadband connection to make and receive calls from any phone number. By year's end, a million U.S. homes will be using broadband to make phone calls, and 10 million by 2008, several analysts have predicted.

VoIP Communications Joins Escape International as Representative of Team Manager

Morrow, GA 30360

Dear Mr. Will Hughes:

Per request by Mrs. Sara, at the Circuit City Corporate Main Office at 1.800.251.2665 at 1054 am, on Dec 8, 2004, suggested and approved that we contact you on my company letter head about setting up a VoIP Communications Demo Display VideoPhone in your store area during the holiday. (All Metro–Outlet) With these arrangements, the VoIP Communications will conduct media ads with your store demo, for the shopper to visit and see the display VideoPhones.

We are an Atlanta start–up VoIP Communications with Escape International and 8x8, Inc. (Nasdaq: EGHT), the Packet8 Voice over Internet Protocol (VoIP) and videophone communications service provider, announced the availability of its DTA Broadband Phone Adapter and DV 326 Broadband Videophone at VoIP Communications <http://www.voippacket8.net> with Escape International Company: <http://www.escapeinternational.com/>, whose broadband VideoPhone service with Freedom Unlimited U.S & Canada Video calling broadband software lets anyone become a small–scale Internet business provider, Virtual Office hosted PBX Services and a Home–based business.

The Founder, Chairman and CEO of VoIP Communications, Nate Perkins, says it's close to letting people create their own miniature phone networks as well as a small home business.

RECOMMENDED: By Consumer Guru CLACK HOWARD "Internet Phone Line Save Money" "Good Deals available from Packet8" AJC (Atlanta Journal & Constitution) 11/20/04

The Videophones allow subscribers to see each other as they speak. The number Voice over Internet Protocol (VoIP) households is expected to mushroom to 18 million by 2008 as service quality increases, already inexpensive rates continue to drop and more homes get broadband, which VoIP operators usually require.

Mr. Hughes, if you agrees with the agreements, we will only need a very small area to display the VideoPhones demo. We have enclosed the company's coupon and PRESS RELEASE for your and your staff information.

If you need any more information, please call me at 678.565.8633 or email: CEO @ voipcommunications.com

Sincerely,

Nate Perkins
