We Live in Exciting Times

By John Cali

We Live in Exciting Times by John Cali

The past two weeks I've had some fascinating personal experiences in manifesting. We live in exciting times!

Last week I was looking at a small hard pimple on my thumb. It had been there for years, and I decided I didn't want it any more. I'm sure the medical people reading this will chastise me, but I decided to cut the thing off. So I got out some alcohol to sterilize things, and a sharp knife. When I was ready to start, I couldn't find the pimple. Within seconds, it had vanished without a trace! And it hasn't returned.

Several days before that, I was getting dressed to go out early in the morning before dawn. As I prepared to leave my bedroom, I started toward a lamp on my dresser, intending to turn it off. Before I even got near it, it turned itself off. "Strange!" I thought to myself.

And I've had several other such happenings recently.

While these may be trivial events, they powerfully illustrate my point --- it seems all I had to do was form the intention, and the universe responded instantly.

Chief Joseph

You live in an incredibly responsive universe. There has never been a better time for you to manifest your heart's desires.

Manifesting has never been easier. Creating the life you want, the perfect life, has never been easier.

The energy on your planet has intensified many times over in the past 10 to 20 years. And now you are at the highest point of intensity in the history of your planet, and certainly in the history of humankind. There has never been a more powerful time in your human history. This truly is an exciting time to be alive.

We Live in Exciting Times

The saying, "Ask and you shall receive," has never, ever held more power and meaning for you than it does right now.

You are living in an era of extremes. Extremes of human tragedies and extremes of human joys.

All is well, friends. You only need to choose which end of the spectrum you will experience — hard times or joyful times. Whatever choice you make, it will be yours, and quickly.

Choose your thoughts and your focus carefully. For whatever you think and focus on must manifest.

Since 1992, John Cali has been communicating with a spirit called Joseph. In one of his many

physical lifetimes, this spirit was incarnated as the legendary Chief Joseph of the Nez Perce tribe in what is now Oregon. Email john@greatwesternpublishing.org Website

Three Levels Of Exciting Limousines

By Mads Phican

We all know those black and white stretch limousines that seem to be everywhere nowadays. They all look the same. They all look just like normal luxury sedans if it weren't for the stretched passenger compartment. It doesn't really matter if the stretch limousines are based on Cadillacs, Lincolns or Mercedes Benzs.

Luckily limousines don't have to be that boring. Limousines that are a lot more exciting do exist, but they are better at hiding from public view. Maybe it's because they are more expensive and difficult to make? The only thing we know is that most limousine companies seem to prefer the traditional stretch limousines to the more exciting models.

The least exciting of the exciting limousines are somewhat similar to the traditional black and white stretch limousines. The difference is that they are based on something else than the normal luxury sedans. The least exciting of the exciting limousines can for example be based on a small car like a mini or they can be stretched luxury cabriolets. A stretch limousine without a roof means that we can suddenly have outdoor pools, helicopter pads (it really exist), etc. onboard.

Somewhat more exciting are limousines based on exotic cars. One trend that is slowly spreading to limousines companies is stretch limousines based on exotic sports cars like Ferraris, Lamborghinis and Porsches. More and more limousine companies start to feature these cars in much the same way as they started to feature SUV based stretch limousines a couple of years ago.

The most exciting limousines are out of this world. Some of our favourites include for example a somewhat normal stretch limousine that is rocket driven, a traditional looking stretch limousine where

the wheels have been removed in favour of a set of tank tracks and a private plane that has been grounded after a set of wheels replaced the wings.

Mads Phican runs the website

. Pictures of the exciting limousines

above and many other limousines can be found there.
