What Do Chuzzle, Jewel Quest And Fairies Have In Common And Why Are They So Fun?

By Jon

Three of the most popular online games out there, Chuzzle, Jewel Quest and Fairies, may appear

to be quite different, but in reality, share a very similar game architecture and strategy component. What's different? They all have a unique theme and visual appearance. With Chuzzle, it's the cute little fuzzy characters. With Jewel Quest, it's all about turning sand into gold, and with Fairies, its rescuing the whimsical and hunted fairy ladies. All appealing, and all extremely addictive!

So what are these games really all about?

Chuzzle

This relatively new and extremely fun puzzle game features rows of fuzzy "Chuzzles" that you must drag up and down, and left and right, to match a variety of colors. Once you do, the Chuzzles will pop in dramatic fashion and return to their little test-tube home. Choose from four play modes: Zen mode, Speed mode, Classic Chuzzle and Mind Bendex mode. It also features two difficulty levels.

If you're good, and make a high level of Chuzzle color matches, you get to go on to the next level where the game gets tougher, the Chuzzle locks come more frequently. But there's an upside – the bonuses get higher.

So what's the verdict on Chuzzle? It's a super fun game with non-stop action and lots of exciting pops! If you haven't tried it, give it a whirl!

Jewel Quest

Like Chuzzle, the object of Jewel Quest from iWin is to score as many points as possible by matching items and turning sand to gold. However, with this game, there are six different items that need to be lined up horizontally or vertically in groups of 3 or more. Once you do, you have a match! What happens then? The matched items are removed and new items will fall into the empty spaces from the top of the board.

What Do Chuzzle, Jewel Quest And Fairies Have In Common And Why Are They So Fun?

A few key points to keep in mind with Jewel Quest:

– Making moves in rapid succession will give you a higher score. – Matching both items that you swap and in multiple directions can result in the best chain reactions. – Matching items towards the bottom of the board gives more opportunity for chain reactions. – The most difficult spaces to turn into gold are the four corner spaces.

Your Jewel Quest journal will help give you the wisdom of the ancient scripts and assist you in discovering the fabled Tonatiuh – The Temple of the Fifth Sun. And it will also give you hours and hours of fun!

Fairies

Have you ever been to a Renaissance Fair? Well then, perhaps you will enjoy Fairies. This appealing

online game takes you to a place of fabled legends and magical reality. You become the almighty and powerful wizard, given the rare chance to rescue the troubled group of fairies who have been captured by an evil force.

Again, like Chuzzle and Jewel Quest, you'll see the similarities. But, with its whimsical, other-world feel, it's more different than alike. With Fairies, you are seemingly transported to this other world and asked to be the hero. The question is, will you save the troubled fairies? And how many will you save? If you complete the hundred individual levels, you'll be sure to restore balance to their world and have a ton of fun in the process!

So, what specifically do these great games have in common?

They are all classic match-style games. Simply put, your job is to find the commonality between the individual pieces, and put them together. Why is this basic premise so mentally stimulating? Because our brains are conditioned this way in the first place. It's one of the key qualities our mental faculties possess to help us make sense of the world. Grouping things together into their rightful places is an important skill to use - and get good at. Think about it: when you're putting groceries away, what are you doing? When you plan your Saturday schedule with the kids, what are you doing? When you're deciding what to wear in the morning, how are you going about it? That's right - you are putting things together in logical places, in logical order or the way you think things will compliment other things.

The popularity of these games continues. Other games like Super Collapse III have similar game play, and with the third edition to the Super Collapse series coming out, these games continue to earn the interest and dedication of game playing fans.

Why are Chuzzle, Jewel Quest and Fairies so fun?

Charming graphics, simple strategy, catchy music and they relax and stimulate your mind at the same time. A great escape!

Do You Love True Musical Talent? Jewel Tickets Are The Perfect Tonic For Your Desires

By Jay Nault

If pure vocal talent is what drives your interest in music, then Jewel tickets are definitely for you. Jewel is known worldwide as having the voice of an angel, and her on-stage persona creates an atmosphere that's as intimate as any concert you'll ever attend. Jewel may be relatively young, but her breadth of knowledge in regards to vocals belies her age. A look at her life may explain how she came to be so loved on so many continents.

Early Life

Jewel Kilcher was born on May 23, 1974 in Payson, Utah. Her parents were German-speaking immigrants from Switzerland, which explains one of her skills. Her parents split up when she was very young, and she moved to Homer, Alaska to live with her father.

She lived the life of a true Alaskan, as her childhood home did not have indoor plumbing, and she helped her father make a living by singing in local taverns. This was also the time when Jewel honed one of her seemingly-hereditary skills – yodeling. It can often be heard on her albums, and she takes great pride in this traditional skill.

Her vocal skills flourished with practice, and this talent coupled with her academic success earned Jewel a scholarship to the prestigious Interlochen Arts Academy in Interlochen, Michigan. While attending Interlochen, Jewel learned to play the guitar, which would become an integral part of her act.

After leaving Interlochen, Jewel headed west to pursue her musical dream. She settled for a time in San Diego where she played in local coffee houses for a relative pittance, and as a result she spent time living in her van. However, she gained acclaim in San Diego, as locals soon saw Jewel tickets as something to pursue for her small and sometimes-impromptu shows.

What Do Chuzzle, Jewel Quest And Fairies Have In Common And Why Are They So Fun?

Career Beginnings

Jewel's gigs at these coffee houses, particularly Java Joe's, led her to be discovered by executives at Atlantic Records, and she soon signed a recording contract. She released her first album in 1995, and it was a success. Pieces of You climbed to number four on the album charts and stayed in the top 200 for more than two years, selling more than 12 million copies. Many of her songs from this cut came from recordings at her coffee house performances. Jewel didn't have to live in a van anymore.

She waited three years to put out her next release, but Spirit was also a smashing success, as it sold more than 4 million copies. Since then, she has released three additional albums, all of which sold over 1 million copies. Her newest release, Goodbye Alice in Wonderland has only been on the market for a short time, but it's selling quite well.

Personal Efforts

Jewel is avid in her efforts to help those less fortunate. In 1999, she launched a non-profit organization called Higher Ground For Humanity, and its purpose is to help provide access to clean water. Hence,

the first project for Higher Ground For Humanity was and is The Cleanwater Project, which installs pumps and wells to increase the flow of clean water to impoverished towns. The project focuses its efforts on South America, Central America, India, and Africa.

Overall, Jewel's talent may be what made her famous, but her heart is what keeps her motivated. Jewel tickets will introduce you to a complete person, and one who wants to leave the world a better place than when she found it.
