A story of 2 friends traveling

Title : Written in sand or on stone

Two friends were walking through the desert. At some point during the journey, they had an argument, and one friend slapped the other on the face.

The one who got slapped was hurt, but without saying a word, he wrote in the sand :

" Today my best friend slapped me on the face".

They continued walking until they came to an oasis, where they decided to take a bath. The one who had been slapped got stuck in the mire and started to drown, but his friend saved him.

After he had recovered from the ordeal, he wrote on a stone :

" Today my best friend saved my life".

The friend who had slapped the other, asked :

Why written in sand or on stone?

"After I hurt you, you wrote in the sand.
But now, you write on a stone. Why ?"

The other replied : " When some hurts us, we should write it
down in sand, where the winds of forgiveness can erase the
hurt away. But when someone does something good for us,
we must engrave it in stone so that no wind can erase the deed."

Learn to write your hurts in the sand and to carve your
blessing in stone.

The end.

Decorating with rocks, the beauty of rustic decor

Why written in sand or on stone?

By Joseph Lewitin

Decorating with rocks, the beauty of rustic decor by Joseph Lewitin

Rocks are dirty, crude, hard, and just plain nasty. But there is another side to rocks. They are also durable, beautiful, and come in a huge variety.

When a piece of stone is cut from a mountain, it is cut into a giant slab. This slab looks like a giant landscape. The stone can be any color that exists in nature, red, green, yellow, and these colors are streaked across the face of the stone. When it is cut or broken down, each piece becomes a tiny unique item that can then be turned into any number of beautiful decorating items.

The most common stone household item are stone tables. Stone tables match stone and ceramic flooring. They are one of a kind, and beautiful. They can easily be set up indoors or outdoors, and they dont stain, because rocks dont stain.

Stone can also be crafted into desk clocks, wall clocks, coasters, and more. Almost anything can be made from stone.

By bringing stone into a design scheme, you give the room a sense of solidarity. A rustic feeling, that you cant achieve easily in modern homes. It comes in almost any color you can imagine, and each item is one of a kind.

So next time you dismiss rocks as just being, rocks, think about the many aspects of stone decorating that are out there.
