Wine, Wine Clubs & Storage

By Dennis Conner

For those who enjoy the taste of a fine wine, signing up for membership in a wine club may be just

the ticket for quenching your thirst. Wine clubs are designed as special interest clubs that are tailored to educating their members on fine wines and also the sampling of various wines from around the world. Today, there are a number of wine clubs in existence with each operating differently from another. One of the most common practices of wine clubs is a monthly or annual subscription fee, which must be paid by the members, in exchange for the privilege of inclusion.

Among the popular activities shared amongst wine club members include regular receipt of fine wines from around the globe, purchase discounts, invitations to wine events and tasting sessions, information and news surrounding the industry and opportunities of travel to regions known for wine making.

In order to comply with legal requirements, wine club members must be age 21 or above prior to enrollment. New members are often required to provide two forms of identification. For those who are eligible, wine clubs are proving to be well worth the cost. In addition, it gives members an opportunity to sample free wines that they may otherwise not have the opportunity to try.

After joining a wine club, you may find that your newly inspired knowledge has lead to an impressive collection. In order to keep your wine organized and stored safely, you may want to consider the purchase of a wine rack. These storage devices are designed to house wine bottles for long term aging, but may also be used as temporary storage. The majority of wine racks are created so that the wine bottles may be stored on their side while maintaining a slight slant toward's the neck of the bottle. By storing the bottle in this position, the wine will remain in constant contact with the cork, which will then be prevented from drying out. Depending on your choice of material and your budget, you may be pleasantly surprised to learn that wine racks are made of a variety of materials. This includes stone, wood and steel and the capacity can range anywhere from several bottles of wine to thousands.

For many, wine is an investment. For others, it's a passion. Regardless of whether you enjoy the taste of a fine wine for love or for profit, being introduced to samples from around the world and knowing how to properly store and preserve your wine will make the taste in your mouth even sweeter.

Add Elegance And Luxury To Your Wine Drinking With Wine Storage Furniture

By Mary Murtha

Nothing speaks of elegance quite like a fine piece of wine storage furniture. The truth of the matter is that there is an abundance of products on the market - for seasoned connoisseurs of wine to the occasional drinker - that can add a fancy look to your home.

Wine storage furniture can range from storing only a few bottles to massive and intricate storage systems capable of filling up an entire wine cellar. The decision you have to make is which piece of wine storage furniture best suits you.

The storage of wine is highly important to the preservation, aroma, taste and color of the wine. If wine is not stored properly it will begin to lose all of these essential attributes. Fine wine collectors especially have to consider this possibility as certain bottles of wine can cost thousands of dollars.

There are a few ways you can go in selecting the proper wine storage furniture for you. One method is to buy one of the manufactured products that have saturated the market. If you look around, the bulk of consumer product retailers have gotten into the wine storage furniture market. These products can also be found on the Internet with relative ease. Just type in your search query and you will instantly be greeted with thousands of products to sift through.

Another, more costly way is to look into a custom unit. This is recommended for serious wine connoisseurs. Custom wine storage furniture can be tailored to fit your home, especially if you are lucky enough to have a wine cellar. Contractors and experts creating this form of storage are available. If you have invested heavily in wine this may be the best option for you.

Don't forget that the temperature you store your wine in is very important. Make sure you factor this important information into your decision. The majority of wine storage furniture on the market is not equipped with coolers. Instead, simple wooden racks and cabinets rely on your setting of room temperature to properly store the wine.

The next time you are at a wine tasting event remember to ask people for their opinion on how to store wine and their recommendations as to the best furniture on the market for doing so. As one of the finer things in life, wine should be treated like royalty.
