Winning Euromillions Lottery Prizes Every Week, Without Buying Tickets

By Rui Mart

Join a mathematician, internet technology, network marketing, the vision of two business man's, register it in the Lotteries Council, and the lottery players will win euromillions lottery prizes each and every draw, without buying tickets.

Tom Brodie, with a successful 12 years background in sales, marketing, database development and internet marketing, partnered with Len Fitzgerald, who opened one of the first-ever video rental stores in the UK in 1984, founded the e-lottery Syndicate in April 2002.

They thought, since there isn't a single person in the world, who wouldn't like to win a fortune in the lottery, why not finding a way, to help as many people as possible, achieving their dreams.

They hired a university Professor of Mathematics, brainstormed how they could achieve their purpose, and ended up with a syndicate system, that boost the odds in advantage of the lottery players. People playing with their syndicate system, will have a significant advantage over the regular player who plays alone. They will have greater possibilities of winning the jackpots, and will win more prizes and money.

Their system allows people from all over the world, to play two of the richest tax free lotteries in the world, the United Kingdom National Lotto, and EuroMillions, the european lottery.

Each syndicate player receives a fixed set of numbers, and due to the syndicate system it's only necessary to hit one number to receive prizes, in Euromillions.

The advantage of playing in the syndicates is a massive 3600% greater chance of scooping a EuroMillions jackpot! The chances of having any prize jump to only 1 in 10. They applied network marketing to the system, and each member that presents the e-syndicate to five other people, will start playing for free. After that will receive commissions for each additional member, and will receive an additional set of numbers, for free, for each group of new 15 members.

And here is the "trick" for winning euromillions lottery prizes every week, without buying tickets.

Winning Euromillions Lottery Prizes Every Week, Without Buying Tickets

In Euromillions, syndicate players receive a fixed set of five numbers, and if only one of the numbers comes out in a draw, a prize is received by the syndicate. Since there are a total of fifty main numbers, from one to fifty, players, who have more than ten sets of numbers will cover the all range of numbers, and in the worst scenario, will match each draw number, from 5 different set of numbers and syndicates, and five prizes will be won.

Rui Mart, is a online marketeer since 2002.

Euro Millions is Becoming The Biggest Lump Sum Lottery In The World

By Gino Harteel

With its first draw having taken place as recently as 13th Feb, 2004, EuroMillions is among the newest to join the ranks of world-class lotteries. It's played every Friday and shown on TV channels Sky One in the UK, TF1 in France and TVE in Spain.

And it's a truly multi-national affair. Because it's operated jointly by the national lotteries of the UK, France, Spain, Ireland, Belgium, Luxembourg, Austria, Switzerland and Portugal — with the rest of Europe expected to follow.

Jackpots Predicted To Exceed £ 50 Million, EURO 71 Million, US\$ 93 Million.

Maximum payout on Friday May 14, 2004 was £ 23703102 or EURO 33816137 or US\$ 44082802.

Become a Player Member and we instantly allocate you one of 39-places in a EURO SYNDICATE, emailing you confirmation with a virtual VWD Membership Card. The card bears your 5 lottery numbers, picked from 1 to 50, which we enter automatically in every Friday draw.

After each draw we check your numbers electronically and send your winnings directly to you by cheque or by PayPal.

3,600% Greater Chance Of Scooping A Jackpot...

And 2 Less Numbers To Have To Match!

If you've played the EuroMillions game normally on your own or in a conventional syndicate before, you're probably thinking: "Hold on a minute! You don't play EuroMillions with just the five numbers from 1 to 50, you play with the five numbers plus two Lucky Star numbers picked from a separate set of 1 to 9, as well"...

And you'd be right.

But that's the really great thing about the e-Lottery... effectively, you only need to play with just the 5

Winning Euromillions Lottery Prizes Every Week, Without Buying Tickets

numbers. All because those numbers — 'Main' numbers as we call them — are combined with all permutations of the 9 Lucky Star numbers in a strict mathematical pattern so you know before every draw that you're going to match both Lucky Star numbers in every draw.

And with two less numbers than normal to have to match, not only will you have a 3,600 per cent greater chance of scooping the jackpot, your chances of winning any prize jump to only 1 in 10...

In fact, you qualify for a prize even when you match just 1 Main number!

How have we arrived at those odds?

Well, we could show you the computations, but for simplicity, best just to say that the figures aren't ours; we consulted a university Professor of Mathematics to work them out for us when developing the system.

Scoop As Many As 36 'MULTI-WIN' Prizes Every Week

What's more, for the System to work — to 'guarantee' the vital Lucky Star numbers — it needs precisely 36 single line entries in every EuroMillions draw...

Which means you get 36 chances of winning in every draw!

But that's only part of the prize-winning power in the System. Thirty-six entries means you also harness the capability of the system's MULT-WIN METHOD .

Incredibly, when you win, you never win just one prize...You win up to 36 prizes!
