Writing A Successful Ebook

By Shelley Lowery

Writing A Successful Ebook by Shelley Lowery

With today's advanced technology, it has never been any easier for anyone to self-publish their own ebook. What's more, you can create and market your own ebook (electronic book) for an unbelievably low price. Once you purchase an ebook compiler and create your ebook, you'll automatically have an entire stock of inventory on hand continuously. In addition, when you begin selling your ebook, you'll pocket nearly 100% of your profits for each sale.

As you probably know, the Internet is all about information and automation. Internet users want information and they want it right now. That's why ebooks are considered to be the "perfect" online product. They provide Internet users with the information they desire and can be instantly downloaded.

The key to writing a successful ebook is to write for your potential customer. In other words, you must provide your potential customers with the information they desire. I know, you're probably thinking, "how on earth do I know what my potential customers want?" Well, there are a number of ways you can learn exactly what they want. For example, visit some online discussion groups in the area of your expertise. Go through all of the posts and read all of the questions. If you see the same questions posted on several groups, then this should give you a good idea as to what your potential customers want. Visit forums, message boards, and newsgroups -- subscribe to email discussion lists -- visit Amazon.com to see the top selling books and see if you can develop your ebook accordingly.

Once you've determined the focus of your ebook, your next step will be to break your subject down into about 10 – 12 different areas. Each area will represent a chapter. For example, if your ebook is focusing on dog grooming, your chapters might look something like this:

- Introduction to Dog Grooming
- Dog Anatomy
- Medical & Skin Problems
- Bathing & Brushing techniques
- Proper use and care of Equipment

- Clipper & Scissoring techniques
- Specific Breed Trims
- Mixed Breed Trims
- Safe Handling and Restraints
- Rare Breed Recognition

Once you have created your chapter titles, you can begin writing each individual chapter. When you begin writing, keep in mind, reading on a computer screen is much more difficult than reading from paper. It not only causes eyestrain, but it is also a much slower read. With this in mind, keep your writing to the point and avoid any filler information that really isn't necessary. Provide your readers with all of the information required for each chapter, but keep it as simple as possible.

Write your text in small blocks and leave a space between each paragraph. Use an easy-to-read font such as Arial or Verdana and use black text on a white background. In addition, make sure you use plenty of white space. White space is the empty space between your paragraphs and around your text. You certainly don't want to overwhelm your readers with a solid page of black text. Not only does it look bad, but it certainly won't keep their interest.

It is very important that you do everything you can to make your readers as comfortable as possible. If your text is difficult to read, your readers will not only become frustrated, but it will also make your ebook appear to be unprofessional. Your ebook should be well organized and enable your readers to easily locate important information.

To spice up your ebook's appearance, you may want to add a colorful border, subject dividers and relevant images. In

addition, enlarge your subtitles to enable your readers to easily recognize the beginning of each new section. By adding these extra touches to your ebook, you will not only improve your ebook's appearance, but it will also keep your reader interested.

Shelley Lowery is the author of Ebook Starter. A complete ebook design kit that takes you step by step through designing, creating and marketing your own ebook. Give your ebook a professional look in just a few simple steps with over 100 ebook interface and cover templates.

Ebook Review: How to Write and Publish Your Own eBook in as little as 7 days

By Andy George

Jim Edwards and Joe Vitale who are both well known in the Internet online industry wrote this eBook. The 2004 version of this book is 206 pages long though it should be mentioned that less than 100 pages are concentrated on the theme of the eBook whereas the rest of the eBook involves interviews with various successful eBook authors (in the eyes of Edwards and Vitale) and bonus reports.

I believe that Edwards and Vitale were wrong to follow this approach since when one tries to overkill with respect to information, the result is opposite to the one intended since the reader may be confused even more and in my opinion the eBook would have been more effective if it was shorter and did not include the interviews with these authors whose approaches were different. Perhaps Vitale and Edwards should have sold the interviews by the eBook experts as a separate eBook.

The 7-day eBook was written in an unorthodox style in that it was written in a "chatty" style rather than in a formal manner. To be fair to the authors this did help in maintaining the interest of the reader.

The content of the eBook contained some very useful aspects such as: Distinguishing between a successful and failure formula for an eBook. Tips for selecting a topic for an eBook How to write the eBook in 7 days - though I think this target may be ambitious in practice the methodology mentioned by the authors is worth considering. Various tips on how to publish the eBook.

The price of the eBook is in my opinion reasonable value considering the money that can be saved by reading this eBook and the valuable links that can be obtained from the eBook. But I felt at times that the authors over elaborated and could have been more concise in their writing.

Overall I believe that a purchase of the eBook for a price under \$30 is worth buying despite its limitations.

Andy George is a qualified chartered accountant who was born in Birmingham, England and who has had many years' experience in public practice, industry, and commerce and as a lecturer. Since 1991 he has been based in the island of Cyprus. Andy was a financial correspondent for eight years at the Cyprus Financial Mirror where he wrote articles on business and accounting related issues to a

non-technical audience.
