First Lessons

These lessons are mostly for beginners. If you have some knowledge about playing the guitar, you may skip some of these. This is up to your teacher to decide.

However, if you're holding a guitar for the first time, this is where your teacher will usually start. You will be taught the fundamentals about playing a guitar in general and playing rock guitar in particular. You will learn the basics about rock lead guitar and power chords. After these first lessons, you will have some idea on how to play classic rock guitar. If you get these right, you are on your way to actually playing rock guitar.

Electric Guitar Improver

In the next lessons, you will probably be taught various rock techniques, such as sliding, string-bending, pull-offs, vibrato and hammer-ons. These tips will enable you to play some fairly good rock solos. You will also learn about scales and chords that will help you start making up your own music.

There might be a lot of blues references within these lessons. Going through all these will help you understand the relation between blues and rocks, which is essential if you want to learn to play rock guitar like a pro.

Power Chords

Power chords are two or three string distorted sounding chords used in some of the most popular rock songs of all times. You will learn to play several rock songs during the first few lessons of this module. Afterwards you will be very familiar with the fretboard and surprise yourself with the sounds you will be able to play.

If you seriously want to learn to play rock guitar, don't get frustrated or discouraged if you're not playing the way you would like to at the beginning. If you enjoy playing, the progress will come at some point. Find a guitar teacher you communicate well with, design a workable schedule to practice and, most importantly, try to have fun while you're learning.
